TO THE

SECRETARY OF THE INTERIOR.

1903.

WASHINGTON: . GOVERNMENT PRINTING OFFICE. 1903.

REPORT

OF THE

ACTING SUPERINTENDENT YOSEMITE NATIONAL PARK.

DEPARTMENT OF THE INTERIOR, OFFICE OF THE SUPERINTENDENT, YOSEMITE NATIONAL PARK, Wawona, Cal., October 8, 1903.

SIR: In compliance with the instructions of the Department I have the honor to make the following report of the condition of affairs and management of the Yosemite National Park for the year ending June 30, 1903, and for the period from July 1 to date.

Pursuant to General Orders, No. 15, dated Headquarters Department of California, San Francisco, Cal., April 21, 1903, Troops K and L, Ninth Cavalry (4 officers and 103 enlisted men), left the Presidio of San Francisco, April 25, 1903, and marched to the park, arriving May 7, 1903. The distance—279 miles—was covered in thirteen days. The command immediately established a camp on the site the troops on duty in the park have heretofore occupied, 1 mile west of Wawona. I arrived and assumed the duties of acting superintendent, May 14, 1903.

The place now occupied by the troops for camping is decidedly too limited for such a command. The most suitable site for a cantonment, to judge from personal observation, would be on the homestead claim of A. B. Van Campen, in the park near Wawona Bridge, but his price—\$5,000—is deemed excessive.

Major Hein, Third Cavalry, acting superintendent, has reported on matters affecting the park for the season of 1902, under date of September 25, 1902. His command broke camp about or before the middle of October, earlier than usual, it is understood, on account of the severity of the weather. After the departure of the troops and until the arrival of the Ninth Cavalry, Rangers Leidig and Leonard had direct charge of the park, but submitted their reports through Forest Ranger Britton, of Sequoia National Park, who changed certain approved recommendations of the former acting superintendent with respect to the destruction of the débris in the forests of the park, though his personal knowledge of conditions was obtained through one visit to Camp Wood. The rangers report nothing happening of importance during the winter, except the usual destruction of the game, in

violation of the State laws, just outside the boundaries of the park. This season we are in a measure prepared for this, having had Rangers Leidig and Leonard appointed deputy fish commissioners of the State, and as such they are empowered to make arrests for all violations of the State laws affecting game and fish. In connection with this subject I desire to strongly recommend the protection and preservation of the game in the forest reserves bordering on the national parks and reservations. It is believed that the park has been more thoroughly guarded and patrolled this season than before, owing to the establishment of permanent patrolling stations, with from four to six men each, changed monthly. These do efficient work without so much wear and tear on the riding and pack animals. This method was instituted and the positions of the posts were established on the suggestions of Capt. Harry C. Benson, Fourth Cavalry, and the rangers. Benson spent several seasons here, and takes a deep interest in matters affecting this park. Only the sergeants and corporals were allowed to carry their carbines, the privates being armed with revolvers, and there has been no complaint or rumor of improper conduct of any member of this command with respect to killing or catching any game or fish.

The guard at Camp A. E. Wood was placed at the entrance to the camp and along the main highway leading to the Yosemite Valley. All persons entering the park were required to give up their firearms, or, when they desired to leave the reservation by another road, the arms were sealed and delivered to the owners with a permit to carry the sealed weapons through the park. During the season the firearms taken up at this camp were as follows: Rifles, 47; shotguns, 36; revolvers, 15; total, 98. These have been returned to owners at their expense, when claimed, on or after departure from the park.

I established subposts, each consisting of 1 noncommissioned officer and from 3 to 9 privates, at the following named points:

Little Jackass, June 12; Agnews, July 18; Lambert's Soda Spring (Tuolumne Meadows), June 26; Return Creek, July 15; in Hetch Hetchy Valley, June 1; Crockers (Sequoia), May 23; and at Buck Camp, October 1.

A post was established at Jersevdale near Mr. Brenham's place. May 25. There is in the vicinity of the last named station a large area of patented land within the park. Nearly every proprietor keeps more cattle than he can feed on his own ranch, and there was a tendency on the part of these people to violate the regulations by turning loose their stock to graze at will. The detachment commander was given instructions to patrol in the Sweetwater Mountains and to notify all cattle owners when their stock was found on the reservation. The owners invariably removed their cattle from the park when notified, and the substation was discontinued July 12, 1903. Thereafter until the end of the season patrols were sent to that locality. During the latter part of September it was reported that Mr. L. E. Hanchett, who owns a patented mine inside the park, had taken posession of mining claims adjacent to his property, with the intention of cutting off the timber for use in working his mine. A detachment was sent immediately to his claim in the Sweetwater Mountains, but Mr. Hanchett was away in San Francisco and had left no one in charge. He has been notified by letter and requested to comply with the law and regulations in the matter of mining claims.

The substation at Agnews was changed to Devils Post Pile, August 26, and again moved to Hot Springs, September 19. The troops serv-

ing at all these substations were relieved once a month. The detachment commanders made daily patrols, so as to cover all the approaches to the park and all the territory where sheep and hunters were likely to be found. Each substation was visited and inspected at least once a month by an officer's patrol. The records show (to date) that more than 26,000 miles have been covered by the different patrols in the performance of their duties.

Only one band of sheep, numbering 2,000, branded (A) (Circle A), and owned by Angel Arriet, have been found some distance inside the boundaries, though it is not considered an exaggeration to say that over 100,000 have grazed up to the bounds, and several bands have gotten inside a short distance. The owners of the brand P and (\widehat{A}) (Circle A) have been particularly aggressive. In no case has one of these trespassing sheep herders been found to be a citizen of the United States. Arriet's herd was found well within the park by Rangers Leonard and Leidig in September. Arriet had with him three herders and a complete outfit of horses, pack mules, and camp equipage. He was brought to camp and detained until instructions could be received from your Department. The first instructions received only directed that he be removed from the park. As he is an old offender, I telegraphed for authority to use measures that would make an example of him and be a warning to others, but before the Department telegram came authorizing me to put his sheep off the park at one place, he and his herders at another, and the horses and pack animals at another, he had passed beyond the limits of the park. Other owners when warned thereafter kept their stock away. A total of 14,900 sheep were removed from the outer edges of the park during the season. Only the utmost vigilance, the establishment of the substations, and constant patrolling from them, prevented the reservation from being overrun by sheep this season, which was extremely dry.

No evidence of the destruction of any game or fish was found. In my opinion, the amount of game within the park is not as great as is generally supposed. The animals leave the higher altitudes as soon as snow comes, and in the lowlands and meadows about the park fall easy prey to the hunter. There is a good supply of fish in the streams and lakes, and every year a great many are caught with hook and line; consequently the supply must be replenished from time to time. The distribution of rainbow and cutthroat trout from the Wawona hatchery during 1903 amounted to about 250,000, in the main streams and tributaries of Bridal Veil Creek, Merced River, and Ostrander Lake. Ranger Leidig takes special interest in such work, and his experience was very beneficial.

Except in the vicinity of Jerseydale, cattle have caused little trouble. A limited number could do no damage to the reservation, but if a few were permitted to graze it would make it impossible to keep off larger herds, which would soon destroy the trails that have cost considerable money to build and keep in repair. One thousand five hundred and thirty-two head of cattle were removed from the park.

There were ten forest fires within the limits of the reservation during the summer, only two of them being of any magnitude. They were invariably caused by the carelessness of campers or tourists, except in the case of the largest fire we have had, south and east of Mount Starr King, concerning which a full report has already been made. The other fire of large extent was in the vicinity of Chincapin; it occurred in August. During September another fire, reported to be of incendiary origin, broke out in the park near Jerseydale; it was extinguished before it had secured much headway. Early in the season a fire was started by lightning on Wawona Dome. While there have been extensive fires, it is not believed there has been any material damage done to the forest proper. In every case, upon information being received of fires affecting the park, immediate steps have been taken to get a detachment of soldiers on the ground, and the fires have been quickly brought under control.

There is in the big forests that abound on the Government land immense deposits of dead trees, dry leaves, twigs, branches, cones, etc., that grow deeper year by year. In the dry summer season a match carelessly dropped, a thoughtlessly discarded cigar stump, or a tourist's camp fire would start a conflagration which would destroy even the largest trees and devastate the splendid woods that are so necessary a setting for nature's handiwork in this her most favored portion of the world. Campers and tourists can not be excluded, and consequently fires can not possibly be avoided. I strongly recommend a return to the old Indian custom of systematically burning over portions of the forests of the park each year in the autumn. In this way the deposits of dry material would never become so deep that the burning, when there is moisture in the ground, would cause the destruction of the trees, and the fires could easily be controlled. Then, too, I believe the snow would lie just as long as it does now, for it seems that the underbrush and trees do not protect the snows, that the bare places first appear near the roots of the large trees, and that the last places uncovered are the roads and bare points.

Printed copies of the rules and regulations have been posted on all the trails and roads and at the places tourists frequent, so that there is not, to my knowledge, a locality within the reservation where a man can plead ignorance as an excuse for violating the law.

We still have on hand quite a supply of the rules and regulations. I would respectfully suggest that explicit paragraphs be added forbidding the location of mines, water and power claims on Government lands, and any surveying without the permission of the proper authorities. While these prohibitions have been enforced, the wording of the rules and regulations as furnished do not impress the people generally as being sufficiently direct and explicit to prepare them for their strict enforcement.

The fact that toll is demanded of the ordinary visitor on all the roads now in use, which lead through the park and to the Yosemite Valley, is very objectionable. I understand that the full toll for a two-horse conveyance from Awahnee to Yosemite Valley, about 50 miles, is \$6.75. This is deemed excessive. I am not informed as to the rates on the other roads. Applications to the proper county officials for information have not been answered.

The Tioga road should either be repaired by the company owning it or be taken possession of by the Government. Nearly all, if not all, of the bridges on this road are down, and a loaded wagon in some cases has to pass over public lands for a considerable distance to get to the road around the bridge sites. The owners have made only a pretense of repairing it, to prevent their charter from being revoked. This road runs from near Ackersons to the summit of the Sierras, and leads through a most beautiful section of the park no longer known to the tourist. Were it made passable for wagons and animals it would greatly facilitate the work of the troops and add immensely to the attractiveness of the trip through the park. I estimate that it could be well repaired for \$10,000.

The building and repairing of trails has progressed satisfactorily, and at this date all the contract work has been completed, except the trail from the "Sink" to Rodgers Lake. The soldiers on duty in the park, with ax, hatchet, and saw, opened up about 60 miles of trail that had become well nigh impassable from fallen trees and the growth of underbrush. There are yet many miles of trails needed to make possible the proper protection of the park and render it accessible to visitors, and after the snow melts in the spring repairs should be made to portions of nearly every bridle path in the park. In compliance with your letter of instructions of May 6, the list of

In compliance with your letter of instructions of May 6, the list of patented lands found on file with the records of the department was sent to the register and receiver of the United States land office at Stockton, Cal., who promptly returned it with corrections to date, and a copy of this list was forwarded to your office.

It was found impossible to comply with other instructions to determine the metes and bounds of these lands, and by examination by a competent individual to determine the value of the land, timber, etc., it would take a good surveyor with a competent corps of assistants several months, if not a year, to properly perform this work.

I do not recommend the cutting off of one acre of the park. I have already referred in a special report to the devastation of the magnificent forest between the southern boundaries of the reservation and Awahnee by the Sugar Pine Lumber Company, and I repeat my recommendation that the Government take steps to obtain immediate possession of all patented lands in the forest reserve, as well as in the park. From personal investigation I am decidedly of the opinion that the Government should not even go to the expense of surveying these lands, but should use the list as given by the recorder and receiver, United States land office, Stockton, Cal., as a basis for their purchase. They are inside of the park, and their purchase at the rate of \$10 per acre, the usual market value, would be a source of financial profit to every individual interested, when we consider money actually expended in getting possession and paying taxes and such other necessary expenses since the original entries.

The mining claims are few, and it is not believed they will ever materially endanger the interests of the park. This can not be said of the timber claims, which we consider a menace to the park, as wealthy milling corporations are buying them, generally paying less than \$10 per acre, and when they get in their devastating work the natural beauties of the forest and the purposes for which this park was created will be materially affected. Mr. D. J. Foley, in his Yosemite Souvenir and Guide for 1903, says:

Thanks to the watchfulness of the soldiers, these people (the sheep herders) and their herds have gone elsewhere, and so the vales and glens of the Sierras have once again appeared in all the beautiful colors of their native flora. Then, too, the lumbermen vandals, of another but equally dangerous sort, have been prevented from eutting out the timber along the three routes to the valley. * * * There is only one Yosemite, and its forest approaches should be kept in a virigin state forever.

The lumbermen, whom Mr. Foley terms "vandals of another sort," are now at work, and in a few months there will be no forest approach along the most traveled route to the park.

The inadvisability of having the State grant within the national

park is now being discussed by prominent and influential residents of this State. The idea that the General Government should own the whole reservation is popular with the public. I believe that the United States could obtain possession of the Yosemite Valley from California if the matter were properly brought to the attention of the State authorities.

Every acting superintendent of the park has felt the necessity for and recommended the enactment of laws prescribing penalties for violations of the rules and regulations. In our country, where no man can be deprived of life, liberty, or property without due process of law, it is plainly impossible for an officer to properly punish anyone for breaking rules and regulations that have not the sanction of law. Even when the laws are ignored there is no way provided for bringing offenders to trial, there being, I believe, no United States commissioner or district court within 100 miles. I strongly recommend that this park be made a United States court district, and a resident commissioner appointed. The rangers could easily serve as deputy marshals without interfering with their other duties.

The survey of the boundary lines of the park has been completed by Messrs. Jones and Hopper. They are now going over portions of their work with which they are not satisfied.

During the summer sign boards showing distances have been made and put up at most of the junctions of important trails and roads.

Of the appropriation of \$6,000 for this fiscal year there remains unexpended at date only \$254.70 for emergencies.

The expenditures have been as follows:

1.	Trail from Poopenant Valley to Lake Eleanor, about 9 miles	\$500.00
2.	Trail from Lake Tenaya, via McGee Lake, to Smoky Jack Meadows, about	
	14 miles.	575.00
3.	Trail from Rancheria Creek to the "Sink," about 10 miles	550.00
4.	Trail from west summit of North Fork of San Joaquin River to Kings	
	Creek and bridging said river, trail of about 11 miles	1,625.00
5.	Trail near Upper Chilnualna Falls, from Johnson to Chiquita Lake, and	
	from Rancheria Bridge to connect with Poopenant trail to Lake	
	Eleanor, about 20 miles	1,130.00
6.	Trail from the "Sink" to Rodgers Lake, about 10 miles	1, 300.00
Gı	ass seeds for use in park.	50.00
Se	als, presses, etc	15.30

Should no other emergency arise it is believed \$150 of the unexpended balance should be spent on repairing and tarring the two suspension bridges in the valley of the Merced River near Hennessey's Ranch site.

The trail work of all the contractors has been satisfactory, that of contractors Lumsden and Palmer being particularly so.

The work on trail No. 6 has not yet been completed.

My estimate of the amounts of funds needed for the fiscal year ending June 30, 1905, is as follows:

Management and protection: Two rangers at \$1,200 per year	
Total	\$3, 300. 00
 Trail from Yosemite Valley road, and roluges. I. Trail from Yosemite Valley road near "11 mile" to suspension bridge on Merced River, about 14 miles. Trail from Rutherford mine, on Merced River, by Trumbull Peak and Big Grizzly Flat, to Coulter- 	
ville road, about 13 miles 1, 300.00	

Construction and repair of trails, roads, and bridges—Continue 3. Trail from the "Sink," by Burr Valley, Kerrick Can- yon, junction of Thompson and Stubblefield can-	ed.	
yons, and vicinity of Tilden Lake, to Till Till Valley, about 30 miles. 4. Trail from Rodgers Lake, by or near Smedberg Lake, Mottenberg and Sciller converse and trail acceleration	\$3, 000. 00	
Matterhorn and Spiller canyons, and trail crossing of Return Creek, to Smoky Jack Meadows, about 30 miles 5. Trail from Lambert's Soda Spring down Tuolumne	2, 000. 00	
River to Palmer Trail, near mouth of Alkali Creek, about 5 miles 6. Trail from Walker Lake, by Bloody Canyon and Mono	400.00	
Pass, to Tioga road, about 10 miles. 7. Trail from Hopkins Moadows, on Soda Springs trail,	1, 200. 00	
by or near Merced Lake, McClure's Fork, Vogelsang Lake, Tuolumne Pass, and Rafferty Creek, to Tuo- lumne Meadows, about 30 miles	2, 200. 00	
 Trail from McClures Fork, by Detachment Meadows, to Little Jackass Meadows, about 18 miles	1, 200. 00	
10 miles 10. Trail from Chiquita Lake, through park, to Little Jackass Meadows, about 16 miles	1,000.00 1,000.00	
11. Trail from Lake Tenaya to Soda Springs trail, near Hopkins place, about 8 miles	1,400.00	
12. Repairs on trails, roads, and bridges Total		\$16, 100. 0
Cantonment for two troops of cavalry:		1,000.0
1 1	·····	, .
Total estimates for fiscal year ending June 30, 1905		35, 400. 0

If possible the expenditure of at least 1,700 should be available in March, 1904, for t e purpose of working on trails No. 1 and No. 2. This is necessary because this part of the country is without a water supply during the summer months, and the work can not be prosecuted to completion unless an early beginning is made.

I wish to commend Rangers Archie C. Leonard and Charles T. Leidig for their faithful performance of duty. They have given willing assistance to the troops and have been indispensable to me in the administration of affairs in the park.

The guardian of the Yosemite Valley and Mariposa Big Tree Grove reports 8,376 visitors during the season. As he keeps a record only of the tourists who go to the Yosemite Valley and report at his office, or are reported to him by the transportation companies, his figures do not show the total number of persons who have been in the park this summer. The travel has been considerably greater than ever before, and a conservative estimate for the total number of tourists for the season of 1903 would be 9,500.

The nature and importance of the duties of the acting superintendent make it most desirable that an officer who takes an interest in the work should serve at least three years in that capacity. No officer can become well acquainted with the park and all its needs in one season. Lack of continuity of policy, difference in interpretation of the rules, and the fact that each new superintendent only begins to learn what his duties are by the time he is relieved, are all very objectionable features in the present system of management. It is urgently recommended that hereafter the officer who is appointed acting superintendent be given the position for three years if the exigencies of the military service permit.

I desire to thank the Interior Department for its courteous and prompt approval, when possible, of all my recommendations while on duty in the park.

Very respectfully,

Jos. GARRARD,

Lieutenant-Colonel Fourteenth Cavalry, Acting Superintendent. The Secretary of the Interior, Washington, D. C.

RULES AND REGULATIONS OF THE YOSEMITE NATIONAL PARK.

DEPARTMENT OF THE INTERIOR,

Washington, D. C., June 2, 1902.

1. By act of Congress approved October 1, 1890, the tract of land in the State of California described as townships one (1) and two (2) north and townships one (1), two (2), three (3), and four (4) south, all of ranges nineteen (19), twenty (20), twentyone (21), twenty-two (22), twenty-three (23), and twenty-four (24) east, also townships one (1), two (2), three (3), and four (4) south of range twenty-five (25) east, and also townships three (3) and four (4) south of range twenty-fixe (26) east, excepting therefrom that tract of land known as Yosemite Valley, granted to the State of California for a public park by act of Congress approved June 30, 1864, as the same has been surveyed out and accepted by said State, have been set apart for a public park, and the same shall be known as the "Yosemite National Park."

a public park, and the same shall be known as the "Yosemite National Park." 2. The park by said act is placed under the exclusive control of the Secretary of the Interior, and these rules and regulations are made and published in pursuance of the duty imposed on him in regard thereto.

3. It is forbidden to injure or disturb in any manner any of the mineral deposits, natural curiosities, or wonders on the Government lands within the park.

4. It is forbidden to cut or injure any timber growing on the park lands. Camping parties will be allowed to use dead or fallen timber for fuel.

5. Fires shall be lighted only when necessary and completely extinguished when not longer required. The utmost care must be exercised at all times to avoid setting fire to the timber and grass.

6. Hunting or killing, wounding or capturing any bird or wild animal on the park lands, except dangerous animals when necessary to prevent them from destroying life or inflicting an injury, is prohibited. The outfits, including guns, traps, teams, horses, or means of transportation used by persons engaged in hunting, killing, trapping, ensaring, or capturing such birds or wild animals, or in possession of game killed on the park lands under other circumstances than prescribed above, will be taken up by the superintendent and held subject to order of the Secretary of the Interior, except in cases where it is shown by satisfactory evidence that the outfit is not the property of the person or persons violating this regulation and the actual owner thereof was not a party to such violation. Firearms will only be permitted in the park on written permission from the superintendent thereof.

7. Fishing with nets, seines, traps, or by the use of drugs or explosives, or in any other way than with hook and line is prohibited. Fishing for purposes of merchandise or profit is forbidden. Fishing may be prohibited by order of the superintendent of the park in any of the waters of the park, or limited therein to any specified season of the year, until otherwise ordered by the Secretary of the Interior.

8. No person will be permitted to reside permanently or to engage in any business on the Government lands in the park without permission, in writing, from the Secretary of the Interior. The superintendent may grant authority to competent persons to act as guides and revoke the same in his discretion, and no pack trains shall be allowed in the park unless in charge of a duly registered guide.

9. Owners of patented lands within the park limits are entitled to the full use and enjoyment thereof. Such lands, however, shall have the metes and bounds thereof so marked and defined as that they may be readily distinguished from the park lands. Stock may be taken over the park lands to patented lands with the written permission and under the supervision of the superintendent. 10. The herding or grazing of loose stock or cattle of any kind on the Government lands in the park, as well as the driving of such stock or cattle over the same, is strictly forbidden, except in such cases where authority therefor is granted by the superintendent.

11. The sale or use of intoxicating liquors on the Government lands in the park is strictly forbidden.

12. Private notices or advertisements shall not be posted or displayed on the Government lands within the reservation, except such as may be necessary for the convenience and guidance of the public.

13. Persons who render themselves obnoxious by disorderly conduct or bad behavior, or who may violate any of the foregoing rules, may be summarily removed from the park, and will not be allowed to return without permission, in writing, from the Secretary of the Interior or the superintendent of the park.

14. The superintendent designated by the Secretary is hereby authorized and directed to remove all trespassers from the Government lands in the park and enforce these rules and regulations and all the provisions of the act of Congress aforesaid.

THOS. RYAN,

Acting Secretary of the Interior.

Regulations Governing the Impounding and Disposition of Loose Live Stock Found in the Yosemite National Park.

> DEPARTMENT OF THE INTERIOR, Washington, D. C., June 2, 1902.

Horses, cattle, or other domestic live stock running at large or being herded or grazed on the Government lands in the Yosemite National Park without authority from the superintendent of the park will be taken up and impounded by the superintendent, who will at once give notice thereof to the owner, if known. If the owner is not known, notices of such impounding, giving a description of the animal or animals, with the brands thereon, will be posted in six public places inside the park and in two public places outside the park. Any owner of an animal thus impounded may, at any time before the sale thereof, reclaim the same upon proving ownership and paying the cost of notice and all expenses incident to the taking up and detention of such animal, including the cost of feeding and caring for the same. If any animal thus impounded shall not be reclaimed within thirty days from notice to the owner or from the date of posting notices, it shall be sold at public auction at such time and place as may be fixed by the superintendent after ten days' notice, to be given by posting notices in six public places in the park and two public places outside the park, and by mailing to the owner, if known, a copy thereof.

All money received from the sale of such animals and remaining after the payment of all expenses incident to the taking up, impounding, and selling thereof, shall be carefully retained by the superintendent in a separate fund for a period of six months, during which time the net proceeds from the sale of any animal may be claimed by and paid to the owner upon the presentation of satisfactory proof of ownership; and if not so claimed within six months from the date of sale such proceeds shall be turned into the Yosemite National Park fund.

The superintendent shall keep a record in which shall be set down a description of all animals impounded, giving the brands found on them, the date and locality of the taking up, the date of all notices and manner in which they were given, the date of sale, the name and address of the purchaser, the amount for which each animal was sold, and the cost incurred in connection therewith, and the disposition of the proceeds.

The superintendent will, in each instance, make every reasonable effort to ascertain the owner of animals impounded and give actual notice thereof to such owner.

THOS. RYAN,

Acting Secretary of the Interior.
