DISTRICT DATA

Item number 7

Page 1

Smith's Corner District

Adjoining the East Kingston, New Hampshire, town border is the Smith's Corner District. This area includes sites along Main Avenues, South Road, Stagecoach Road, and Chase Road. Area structures date from the Georgian, Federal and Greek Revival periods. District scale is residential and wood is the primary construction material. Stylistic distribution within this district includes five Georgian, one Federal, seven Greek Revival, and two Vernacular style dwellings.

The area is named for the Smith family who were prominent in South Hampton's 19th century development. The architectural character of the district is established by a cluster of four dwellings anchoring the corners of the intersection of Main Avenue and South Road. These dwellings, constructed in the mid-nineteenth century, are in the Greek Revival style and include gable front orientation and sidehall entries.

The density of development found along Smith's Corner proper (intersection of Main Avenue and South Road) reflects the commercial origins of many of its structures. During the mid-nineteenth century the area was noted for its concentration of taverns and associated services trades which supported the stage trade. Representatives of these surviving Greek Revival style structures is the Smith House, historically known as the Central House Tavern (Site 184). Anchoring the northwest corner of the intersection of Main Avenue and South Road, this building includes later Gothic Revival and Italianate style detailing.

Surrounding the Greek Revival Period intersection is earlier, less dense, linear development associated with South Hampton's eighteenth and early nineteenth century agricultural economy. These Georgian and Federal style structures are sited along roads radiating from Smith's Corner proper, and include remnants of agricultural land affording uninterrupted vistas from tree-lined secondary roads.

Early agricultural development in the Smith's Corner District has, to a minor degree, been eroded by contemporary residential infill development. This development has been a consequence of agricultural land subdivision and does not detract from the architectural cohesion or "readability" of the District as a whole. Serving as a representative example of the first generation, agricultural development is the Moses Eaton House (Site 193), a Georgian style farmhouse c. 1750, including intact agricultural outbuildings, open agricultural land and orchard.

Smith's Corner District

The Smith's Corner District is significant for preserving houses dating from South Hampton's early agricultural development (the Moses Eaton House, Site 193) as well as vistas characteristic of this period; an intact grouping of four Greek Revival houses at Smith's Corners corresponding to the public buildings of this period in the Town Center District. The District, which retains architectural and site integrity, deserves protection as a visual record of South Hampton's eighteenth and nineteenth century history.

Originating as an early nineteenth century agricultural section, the Smith's Corner District became an important commercial center associated with the stage trade by mid-century. The Greek Revival architectural character is determined by four examples of the style which anchor the intersection of Main Avenue and South Road. Two of these structures, the George Goodwin House (Site 175, c. 1845) and Center House Tavern (Site 134) are documented as operating as taverns during the nineteenth century.

As such, these structures were part of an active commercial tavern trade which flourished in the town. Perry's local history comments on local tavern licensing policies:

"Liquor licenses were granted freely and from 1820 to 1828, the town record shows licenses were granted to Richard White, Elihu French, Angeline Brown, Thomas J. Goodwin, Toppan Sargent, Parker Merrill, Joseph Stewart, Dorothy Brown, Richard Carrier and others, as follows:

The Selectmen of South Hampton do approve of _____ as a person suitably qualified to exercise the business of a tavern and retailer of spirituous liquors at his house and shop. We do therefore grant him full power and license to exercise said business, and to sell rum, wine, gin or other spirits by retail, that is in any quantity less than one pint."¹⁴

Surrounding the district's cohesive center are earlier, nineteenth century agricultural sites, again documenting the critical historical importance of the sector to the town's economy.

Exemplifying agricultural development in the area is an intact example of a beautifully maintained farm complex, the Moses Eaton House (Site 193, c. 1750) which includes a two-and-one-half story Georgian dwelling, connected barn, detached barn and outbuildings, and remnants of the original orchard.

Continuation sheet DISTRICT DATA Item number 10 Page 1

NAME: The Smith's Corner District

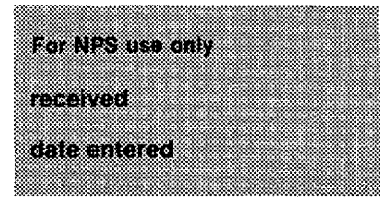

VERBAL BOUNDARY DESCRIPTION: The boundary of the Smith's Corner District originates at the northeast corner of Site 208 (5-23) and proceeds southwest to the mid-point of Main Avenue. Turning southeast, the district boundary follows the mid-line of Main Avenue to a point parallel with the northeast corner of Site 209 (5-9) then turns southwest along the southern border of the property to the northeast bank of the Pow Wow River. The boundary follows the Pow Wow River northwest along the southwest property lines of (5-9) and (5-10) and turns northeast along the property line until it intersects with the south corner of the parcel occupied by Site 195 (4-36). The district boundary then traces the irregular southern perimeter of this parcel to its intersection with the mid-point of Chase Road. Turning southwest, the boundary proceeds along the mid-line of Chase Road to the southeast corner of Site 183 (4-13). Turning northwest along the property line of Site 183, the boundary follows the northern bank of the Pow Wow River to a point of intersection with the southwest corner of Site 175 (4-16) and proceeds northwest along the property lines of Site 175 and 174 (4-17) to the mid-point of Main Street. Turning northwest, the district boundary continues along the mid-line of Main Street to a point parallel with the northeast corner of Site 167 (4-20). Turning southwest, the boundary continues along the border of Site 167; crosses the Pow Wow River and traces its southern bank to its intersection with the eastern border of Site 167. Then the boundary continues along the property line of Site 167 to the East Kingston town line. The district boundary then proceeds east following the town line, crossing Main Street and continues to the mid-line of South Road. Turning south the boundary traces the mid-line of South Road to a point parallel with the northern property line of Site 186 (5-13). It then follows the northern border of this property until it intersects with Site 192 (5-17), then goes north and follows the western borders of Site 192 (5-17) until it intersects with the southwest property line of Site 193 (5-18), and proceeds along this line until it intersects with the East Kingston/South Hampton town line and turns northeast along the town line until it intersects with its point of origin.

BOUNDARY JUSTIFICATION: The boundaries of the Smith's Corner District were established based on historic property lines reflecting original agricultural subdivision as well as mid-nineteenth century commercial use. The former is reflected through surviving open acreage, while the latter is evidenced by denser development at the intersection of transportation routes.

As in the case of the other districts, these boundaries were drawn to exclude unsympathetic contemporary development where possible. The resulting district incorporates a cohesive Greek Revival core with outlying Federal and Georgian Period agricultural development.

ADDITIONAL ARCHITECTURAL AND STRUCTURAL DESCRIPTION:

A prominent feature of this Georgian style house is its large center chimney. The very simple door treatment includes a six-panelled door topped by a four-paned transom light. The windows have nine over six sash and panelled shutters that slide into the wall structure. The interior trim, including Federal mantelpieces, is well preserved. Subsequent additions are the back ell, moved to the site in 1792, and two porches, on the front (north) and west sides of the house.

RELATED STRUCTURES AND CONTEXT:

An attached garage with concrete foundation and a large shed, date unknown.

BOUNDARY AND ACREAGE DESCRIPTION:

Bounded on the N by Clement Lane and Main Avenue, E by Main Avenue, S by Clement Lane and W by East Kingston.

REFERENCES:

Interview with Mrs. Cyril Embree, 2/6/79.

STATEMENT OF SIGNIFICANCE (Evaluation & Historical Associations):

The Norling House, situated at the East Kingston town line, serves as a visual anchor for the area surrounding the intersection of Clement Lane and Main Avenue. The house is very well preserved and, in spite of the addition of two porches, probably in the late nineteenth century, maintains its identity as an eighteenth century farmhouse. The interior detail is intact and contributes to the historical integrity of the structure. The historic name of the house derives from the fact that it has been associated with the Norling family since it was first acquired by Nils Norling in 1913.

Description of View: SE (side) and S (front) elevations

Photographer: Gretchen Langheld
 Negative with: S.R.R.C.
 Negative File Number: SW-70-TR/#2 and 4

ADDITIONAL ARCHITECTURAL AND STRUCTURAL DESCRIPTION:

The house has a very unusual feature in the form of an ogee-shaped pediment above the main door, with drop pendant brackets on either side. (This decorative treatment might have been added at a later date.) There are peaked window caps on all the front windows, and a plain boxed cornice.

RELATED STRUCTURES AND CONTEXT:

The barn (which is connected by a rear ell) is standard post and beam construction and clapboard-sided. It has narrow vertical windows and a rectangular transom light. The stable (shed) in the rear is also of ~~post and beam construction and clapboard-sided.~~

BOUNDARY AND ACREAGE DESCRIPTION:

Two areas: bounded on the N by East Kingston, E by Guild property, S by Main Avenue, W by East Kingston.

REFERENCES:

STATEMENT OF SIGNIFICANCE (Evaluation & Historical Associations):

This house is a good example of a /mid-nineteenth century farmhouse, and is well integrated into the rural landscape. It incorporates end alignment with the street, corner pilasters with square capitals and plain boxed cornice. This home is believed to have been built by Colonel Rufus Dow who is its earliest known owner.

The door, which is recent, is framed by a single full length side light and plain architrave, capped by a peaked pediment and plain wooden transom panel. Two rooms, a rear ell and an open porch with simple supporting columns were all added, date unknown.

RELATED STRUCTURES AND CONTEXT:

There are no existing barns or sheds.

BOUNDARY AND ACREAGE DESCRIPTION: 1.3 acres bounded to the north-East Kingston, Guild, east- McCarthy, south- Main Avenue, west-Guild.

REFERENCES:

Interview, Mrs. Cyril Embree, 2/6/79.

STATEMENT OF SIGNIFICANCE (Evaluation & Historical Associations):

The house was built in 1787 by Ephraim Fitts and is an example of Georgian farmhouse architecture which has undergone several additions and alterations. Its main significance lies in its position in the roadscape between Clement Lane and Smith's Corner. It is centrally located between the Norling House (Georgian) at Smith's Corner and its neighbors are the early McCarthy and Shivik Houses. The Fitts House makes an important contribution in establishing the historical character of the area, especially in the context of the surrounding twentieth century development.

GOODWIN (HARLOW) HOUSE

PHOTO

Description of View: NE Elevation

Photographer: Gretchen Langheld
 Negative with: S.R.R.C.
 Negative File Number: SH-79-4B-#33

ADDITIONAL ARCHITECTURAL AND STRUCTURAL DESCRIPTION:

The main facade of the house contains a central entry and four windows with 6/6 sash. The door itself is six-panelled, flanked on each side by three side lights. The pediment has been removed. The west end of the house is gabled, and the east end of the roof has been beveled, to accommodate the addition of an ell. There is no concrete evidence that a center chimney existed. Interior detail, including some original hardware, suggest a simple dwelling of the late Eighteenth century.

RELATED STRUCTURES AND CONTEXT:

None.

BOUNDARY AND ACREAGE DESCRIPTION:

One half acre bounded on the N by Main Avenue, E by Harlow, S by Sheffield and W by Reynolds property.

REFERENCES:

None.

STATEMENT OF SIGNIFICANCE (Evaluation & Historical Associations):

The architectural integrity of the house, has been compromised by numerous alterations and modifications of the original structure. Period detail is vestigial. It is locally believed that there is a historical association with the McCarthy House across the road, the inhabitants of this house having lived here during the construction of the more high-style McCarthy House. It has some significance in defining the historic character of the area, particularly in relationship to the McCarthy House to its north and the Goodwin (Harlow) House to its east.

ADDITIONAL ARCHITECTURAL AND STRUCTURAL DESCRIPTION:

Greek Revival details include the pedimented gable end facing the street, in this case with a window inside the pediment, sidehall entry, boxed cornices, six over six sash, and corner posts faced with pilasters carrying three-part entablatures. The door treatment features a six-panel door framed by four-paned rectangular sidelights. Over the door is a partial entablature. The window surrounds are plain, with corner blocks in the patera motif. The house has three chimneys, two of which are offset with corbeled caps. The porch with the fieldstone side wall on the east side of the house was added c. 1915 and enclosed some time after 1920. Although the window treatment, with the corner blocks in the patera motif, is consistent throughout the existing structure, it appears that the rear ell pre-dates the main block of the house. It may have been moved to the site after 1848. A special feature of the later (front) part of the house is bird's eye maple flooring.

RELATED STRUCTURES AND CONTEXT:

Modern garage, west of the house.

BOUNDARY AND ACREAGE DESCRIPTION:

Thirteen and a half acres, bounded on the N by Main Avenue, W by Shivik S by Powwow River and E by Reid.

REFERENCES:

Interview with Mrs. Cyril Embree, former owner, 2/6/79

Exeter News Letter, April 27, 1883

STATEMENT OF SIGNIFICANCE (Evaluation & Historical Associations):

The main block of this Greek Revival house is typical of its style and contributes greatly to the aesthetic and historical character of Main Avenue between Smith's Corner and Clement Lane, particularly in the light of recent development in the area. Of added architectural interest is the presence of the rear ell, probably of earlier origin, which makes the format of the house unusual for this period and style.

Historically, its importance is partially related to its use in the late nineteenth century as the Cascade House Tavern. The tavern achieved notoriety in 1883 when a raid of the premises resulted in the seizure of "large quantities of rum, whisky, and fourteen barrels of hard cider" along with a bevy of "female boarders".

ADDITIONAL ARCHITECTURAL AND STRUCTURAL DESCRIPTION:

The house has the typical Greek Revival gable end alignment to the street and has pedimented window caps on the gable end. It has projecting eaves and a boxed cornice with a plain frieze. The Greek Revival door has four panels and is framed by full length rectangular side lights. It is capped by a peaked pediment with panelled architrave. Recent additions such as the connecting ell, three picture windows and a new chimney tend to obscure the original identity of the house.

RELATED STRUCTURES AND CONTEXT:

The new garage, which is shingled, was built on the site of the shed which connected the old barn with the house. The barn burnt down in 1975.

BOUNDARY AND ACREAGE DESCRIPTION:

Nine acres bounded on the N by Main Avenue, E by Chase Road, S by the Powwow River and W by Currier.

REFERENCES:**STATEMENT OF SIGNIFICANCE (Evaluation & Historical Associations):**

This house has undergone many modifications and additions since it was built. Its present importance lies in its location, as a component of the four houses that comprise Smith's Corner (Bragg House, Smith House, Embree House and Hess House.) As a group, they exemplify variations on the Greek Revival theme of the 1830's and 1840's. The house is known as the Jacob Eaton House because, although it is not known if he built it, he is its earliest known owner.

ADDITIONAL ARCHITECTURAL AND STRUCTURAL DESCRIPTION:

Basic Greek Revival elements include gable front orientation to the road, a closed pediment on the gable, boxed cornice and sidehall entry. The present door is of ornate carved wood, framed by rectangular sidelights and simple pilasters, and crowned by an entablature supported by brackets. The corners of the house are faced with simple pilasters. The windows, capped with triangular pediments, have 6/6 sash and are shuttered. Of added architectural interest are the decorative details probably additions subsequent to the original construction, such as the bargeboards and brackets at the eaves line.

RELATED STRUCTURES AND CONTEXT:

Barn with stone foundation. Similar cornice returns indicate that it was probably built at about the same time as the house. Windows with 6/6 sash.

BOUNDARY AND ACREAGE DESCRIPTION:

Thirteen acres bounded on the N by East Kingston Town Line, E by South Road, S by Main Avenue, W by Harold Smith property.

REFERENCES:

Interview with Mrs. Cyril Embree, February 16, 1979;
The Amesbury Daily, April, 1881.

STATEMENT OF SIGNIFICANCE (Evaluation & Historical Associations):

Architecturally, the house reflects the transition from the Greek Revival style of the mid-nineteenth century to the Gothic Revival style of the late nineteenth century. It serves as a visual anchor for what is known as Smith's Corner. Historically, the house had a certain prominence in the late nineteenth century as the Central House Tavern. It was sold at auction in 1881, at which time it was described by a local newspaper as "of unsavory reputation" and "a stigma on the good name of South Hampton." In the 1894 Gazeteer it was referred to as the Central House Hotel.

ADDITIONAL ARCHITECTURAL AND STRUCTURAL DESCRIPTION:

The house has a pedimented gable, boxed cornices, and one corbeled chimney. The entry is framed by molded pilasters with square capitals and a boxed cornice with a denticulated frieze. The Italianate door is framed by two rectangular sidelights and topped by a rectangular transom light.

RELATED STRUCTURES AND CONTEXT: The barn, which is connected to the house by an ell, is standard post and beam, clapboard-sided construction with the back shingled, but it has a handsome square cupola with arched vents on all sides and a boxed cornice. The ventilator is crowned by a simple finial and weathervane. Above the barn door is a rectangular transom light and above that, a round window.

BOUNDARY AND ACREAGE DESCRIPTION: One acre bounded N by Embree, E by Robert Nelson, S by Main Avenue, and W by South Road.

REFERENCES:**STATEMENT OF SIGNIFICANCE (Evaluation & Historical Associations):**

This house is an important visual anchor at Smith's Corner (the intersection of Rte 107A and South Road). It is also an excellent example of the Greek Revival style as adapted to a rural setting. The relatively elaborate door treatment of the house and the decorative detail on the barn may be an indication of the importance attributed to its location by the community at the time the house was built. It is known as the Sam Prescott House because he is the earliest known owner and quite possibly was the builder.

ADDITIONAL ARCHITECTURAL AND STRUCTURAL DESCRIPTION:

Greek Revival features of the house include gable front orientation to the road and a side entry from a small open porch. Simple pilasters frame the main block. The eaves treatment consists of a boxed cornice with cornice returns on the gable end.

The four-panelled door is flanked by five-paned rectangular side lights. Corner blocks in the patera motif form part of the window surrounds. The original windows have been replaced with 2/2 sash. The house has one original chimney, which is stepped. Interior detailing is for the most part intact, and includes tapered door frames typical of the Greek Revival style, four-panelled doors, original mantelpieces and a "beehive" oven.

RELATED STRUCTURES AND CONTEXT: Modern garage.

BOUNDARY AND ACREAGE DESCRIPTION: Three and a half acres bounded to the north by Shoukimas, east by Dollen and Stewart, south by Edward Hess and west by South Road.

REFERENCES: Mrs. Cyril Embree, present owner (1979).

STATEMENT OF SIGNIFICANCE (Evaluation & Historical Associations):

This is a very good example of the Greek Revival style as expressed in the domestic architecture of rural New Hampshire c. 1830-1850. It was built by Cyrus Frank Smith, who operated a blacksmith shop located to the south of the house. It is an integral part of the intersection that has been known for generations as Smith's Corner.

All four of the houses at this intersection (Sites 183, 184, 185, 186) were built at about the same time. New construction in the Greek Revival style reflected South Hampton's prosperity in the mid-nineteenth century, and this grouping of houses provides an important visual link to this era in the town's history.

BOUNDARY AND ACREAGE DESCRIPTION:

One acre bounded by Stuart on the N, Stage Coach Road on the E, Main Avenue on the S, and the Hess property on the W.

REFERENCES:

STATEMENT OF SIGNIFICANCE (Evaluation & Historical Associations):

This house is a good example of an early 20th century one-family bungalow with wood shingles. The use of random fieldstone rubble (for the porch foundation and column bases) was a popular way to complement the rough natural texture of the shingles. This style, indigenous to New England, reflected a concern for the region's colonial heritage. The Nelson house was built on the site of a farmhouse that burned c. 1920. The builder used the foundation of the earlier farmhouse.

Sadre Embree

STATEMENT OF SIGNIFICANCE (Evaluation & Historical Associations):

This complex of early buildings is significant as a local example of what was a large, self-sufficient farm of the 1700's. The layout of the out-buildings is such that each element beautifully typifies its function on the farm as well as integrating the surrounding environment. It is a superb example of continuous architecture. Historically this has been a full-scale operating farm. At one time the peaches produced here were brought to Amesbury in wagons, then taken to Boston by train. From there they were shipped to England and the Continent.

Wings Cupolas Sheds Garage Other
Entry Location: Center Sidehall Other Present entry on ell attached to M.B.

Description of View: Northwest elevation

Photographer: Gretchen Langheld
Negative with: S.R.R.C.
Negative File Number: Sh-79-2B/25A-26

ADDITIONAL ARCHITECTURAL AND STRUCTURAL DESCRIPTION:

Two of the three added ells show minimal Federal characteristics, and the third ell was probably added c. 1890. A modern two-car garage attached to the southern most ell completes the chain of additions. The original entry was in the center of the main facade on the north side. The main block of the house shows evidence of having has a small center chimney.

RELATED STRUCTURES AND CONTEXT: Modern two-car garage appended to the house.

BOUNDARY AND ACREAGE DESCRIPTION: One half acre bounded on the north by Wise, east by Spooner and Old Stage Coach Road, south by Spooner, and west by Chase Road.

REFERENCES:

STATEMENT OF SIGNIFICANCE (Evaluation & Historical Associations):

Probably built as a modest dwelling around the end of the eighteenth century, the house retains little of its original identity, either in general format or interior detail. It never the less, continues to make a contribution to the historic character of the Smith Corner area.

ADDITIONAL ARCHITECTURAL AND STRUCTURAL DESCRIPTION:

The central door is capped by a triangular panelled pediment and is framed by two full length rectangular sidelights. The window sash are six over six. The front yard is buttressed by a handsome old fieldstone retaining wall broken by steps leading to the roadway. Original raised panelling still exists in the four front rooms.

RELATED STRUCTURES AND CONTEXT:

There is a wood-shingled ell with shed roof which connects the main house and the barn. The barn itself is of post and beam construction and is sided with wood shingles.

BOUNDARY AND ACREAGE DESCRIPTION:

Eighty-one acres bounded on the N by Ralph Dennett, E by Stefanski, S by Main Avenue, and W by MacFarland and Furald and Rodgers.

REFERENCES:

STATEMENT OF SIGNIFICANCE (Evaluation & Historical Associations):

Ownership of the house remained in the Currier family until 1943, when it was purchased by the present owner. It is an excellent example of early 18th century Georgian architecture, its most prominent feature being a massive center chimney. The house is visually arresting, set as it is high above the roadway. Coupled with the Reuben Currier (Taylor) House across the street, another Georgian structure built by the same family about a year later, the Dennett House makes a striking contribution to the area east of Smith's Corner and helps to determine its historical character.

Description of View: NE elevation

Photographer: Gretchen Langheld
 Negative with: S.R.R.C.
 Negative File Number: SH-79-4B/#21A

ADDITIONAL ARCHITECTURAL AND STRUCTURAL DESCRIPTION:

An important feature of this fine Georgian house is its massive center chimney which is capped by a double-arched chimney vault. All the windows on the front of the house and the downstairs windows on the gable end have peaked window caps. The entablature above the door is decorated with a fan-shaped wooden panel. The door is framed by two rectangular sidelights resting on panels and the latter are edged by two plain pilasters. The four-panelled door has four rectangular lights set in and running horizontally along the top.

RELATED STRUCTURES AND CONTEXT:

The shed, now used as a garage, has a random rubble foundation and is shingled.

BOUNDARY AND ACREAGE DESCRIPTION:

Fifty acres bounded N by Main Avenue, E by Albert Gray, S by Dennett and Spooner, W by Dennett.

REFERENCES:

STATEMENT OF SIGNIFICANCE (Evaluation & Historical Associations):

Historically and aesthetically, the Reuben Currier House holds a position of prominence in the context of the area's landscape. The house was built by Reuben and Henry Currier on land given to them by their father Samuel, who bought the land from Joseph French in 1727. Reuben and Henry married that same year and soon after the house was built. It remained in the Currier family until 1860. This house, and the Dennett House across the road, also Georgian, combine to make a very clear statement about the original architectural identity of the area east of Smith's Corner.

ADDITIONAL ARCHITECTURAL AND STRUCTURAL DESCRIPTION:

The basic structure is typically Federal in format with the five-bayed main facade facing the road, center entry, and two interior (offset) chimneys. There is evidence of a portico having been added over the main entry, then subsequently removed, as was the pediment. The original door was replaced, probably in 1907. The windows have two over two sash. Additions which tend to obscure the Federal profile of the house include a bay window added to the east of the main entry and a porch on the east gable end. Rear additions include, to the northwest, an attached house probably moved to the site in the mid-nineteenth century (without cellar) and, to the northeast, an ell constructed in 1907.

RELATED STRUCTURES AND CONTEXT:

A large barn was burned in recent years. The foundation remains.

BOUNDARY AND ACREAGE DESCRIPTION: 4.1 acres bounded to the north-East Kingston, east-Richard Cook, south-Main Avenue, west- Elmer Clements.

REFERENCES:

Interview with Mrs. Cyril Embree, 2/6/79.

STATEMENT OF SIGNIFICANCE (Evaluation & Historical Associations):

In spite of later additions to and modifications of the Federal structure, the McCarthy House contributes to the historical character of the area between Smith's Corner and Clement Lane. It is locally believed that prominent area families such as the Dows, the Pillsburys and the Fittses have inhabited the house, and for that reason it is of some local historical interest. Lily Dow, the daughter of Colonel Rufus Dow, did the major alterations in 1907.

ADDITIONAL ARCHITECTURAL AND STRUCTURAL DESCRIPTION;

Open fields owned and grazed by the Moses Eaton Farm

RELATED STRUCTURES AND CONTEXT:

STATEMENT OF SIGNIFICANCE (Evaluation & Historical Associations):

This piece of farmland has been historically associated with the Moses Eaton farm since the 18th century. Its visual integrity has been maintained and is crucial to maintaining the historic agricultural character of the Smith's Corner District.
