9. Historical significance (include explanation of themes checked above)

The very early oak framing elements and joinery in this building suggest strongly that it was built in the late seventeenth or early eighteenth century, perhaps as part of one of the first settler's farms. Certainly further research should be done with regard to title, etc.

CONTROL

This area is significant as an early planned recreational area designed to meet the growing recreational needs of burgeoning urban Boston - The area includes only 20th cent. to 1930's recreational buildings, also included are examples of 19th century industrial remains and 18th, 19th, and early 20th century residences. Taken with the archeological components, this M.R.A. nomination traces the continuous human habitation and use of this land from prehistoric to modern times. This is a good multiple Resource nomination - they have included all the required elements for documentation. Defers to archeologist on the disputed site (Ponhapoag). Requested additional statement of signif. on Eliot Bridge is sufficient justification ^{under} criteria c.

ARCHITECTURAL HISTORIAN

Accept 2 of 3 site - Return Ponhapoag as information currently known is insufficient to determine extent of site and therefore boundaries. Recommend nomination when more is known. Recommend "accept" for the Quarry Site and Green Hill site - the former for its importance in understanding regional lithic procurement, manufacture, use and trading networks; the latter for its potential to contribute to knowledge of Middle Archaic within a state-wide context. State is aware of impending return of Ponhapoag - discussed with Steve Cole.
