ZION AND BRYCE CANYON NATIONAL PARKS

UTAH

OFFICE OF THE SUPERINTENDENT

P. O. ADDRESS:  
SPRINGDALE, UTAH

Office of National Parks,  
Buildings and May 11, 1934

The Director  
National Park Service  
Washington D. C.

Dear Mr. Director:

The following is my report of conditions and operations in Zion and Bryce Canyon National Parks for the month of April, 1934.

000 General

010 Introductory

The excellent travel we have enjoyed throughout the current travel year continued through the month of April, there being an increase of 93% for the month and 90% for the whole year in Zion National Park. While checking operations have not yet started at Bryce, the travel there has also increased in proportion. Visitation to Zion National Park on Easter Sunday, April 1, of 1,250 persons, is the largest travel day in the history of the park.

Notice was received of the transfer of Timpanogos Cave and Lehman Cave National Monuments from the jurisdiction of the Forest Service to the National Park Service and their being placed under the administration of this office. This office now administers two national parks and three national monuments.

All Civil Works projects were terminated during the month. Although a low degree of efficiency necessarily obtained under C.W.A. on account of shortening of hours and depletion of force, the work accomplished under the C.W.A. program was very much worthwhile, and we are happy to have had an opportunity to share in this relief program, in spite of the heavy administrative duties involved.

020 General Weather Conditions

Zion. The weather during the month has been generally warm. The season is about one month earlier than normal; the trees and flowers leaved out fully a month earlier - some flowers were in bloom two months earlier.

Thermometer readings for the month were: mean maximum, 80.06; mean minimum, 50.46; mean, 65.26; maximum, 92 on 11th; minimum, 32 on 3rd. Precipitation totalled .46 inch. Clear days, 18, partly cloudy, 8, cloudy, 4.

Campers have enjoyed the campground this month. We have heard many compliments and two complaints. Both complaints were registered on account of caterpillars on trees. They were exceptionally bad this spring.

Bryce. The general temperature for the month registered as follows: maximum, 63 on 11th; minimum, 12 on the 2nd; mean maximum, 57; mean minimum, 27.6; mean, 42.3. The greatest daily range was 37 on the 1st, 2nd, and 10th, with an average temperature at 6:00 P. M. of 49.1. Precipitation for the month totalled .44 inch. Snow fell to a depth of 2.5 inches, but at the end of the month was all gone except a few patches on the north slopes toward the south end of the park. Clear days, 20; partly cloudy, 8; cloudy, 2.

The month generally has been pleasant. The 3rd and 4th were cold and the last five days brought strong south winds. The month has been ideal for growing vegetation. The grass and early flowers are green and beautiful. All shrubbery in the canyons is in full leaf except the oak. The aspens on the plateau are beginning to show their spring color. The park is not yet suffering from drought as many other places in the state appear to be. The springs on East Creek were visited during the month and the water supply is more than sufficient to supply the lodge and park.

#### 100 Administrative

#### 120 Park Inspections

121 By Superintendent. Frequent inspections were made by myself and my assistants of all C.W.A., Public Works and E.C.W. projects. On the 7th I drove to Bryce accompanied by Assistant Superintendent Parker and Camp Superintendent Rozelle to definitely locate the summer C.C.C. campsite; to inspect the repair of the water line which will supply the camp; and to inspect the road contract. On the 12th and 13th fire inspections were made of all Park Service buildings in Zion National Park. On the 26th I left for Salt Lake City, inspecting Timpanogos Cave National Monument on the 27th and attending to other official matters in Salt Lake City on the afternoon of the 27th and 28th. On the morning of the 29th I met Messrs. Tomlinson and Sceva who had arrived from Mt. Rainier by rail, and we drove to Cedar City, stopping there overnight. Joined there by Messrs. Hanson and Underwood we continued on to Cameron on the 30th enroute to the South Rim of Grand Canyon National Park.

123 National Park Service Officers. On the 13th Chief Ranger Brooks, Park Naturalist McKee and Assistant Engineer Page passed through Zion en route from Grand Canyon National Monument to the South Rim. During their short stop at Zion Mr. McKee inspected our museum and Mr. Brooks was very much interested in our new campground development.

Dr. and Mrs. C. P. Russell arrived at Zion on the 13th accompanied by Mr. Shellback and departed on the 14th.

On the 14th Park Naturalist Presnall departed for a week's detail at Educational Field Headquarters at Berkeley to assist in the preparation of the Zion relief model, the coloring of lantern slides, and other work. He returned to the park on the 24th.

On the 20th Mr. Kent Baird, Superintendent in Charge of the Civil Works project at Lehman Cave National Monument visited my office and discussed matters relating to the closing of the C.W.A. project and the possible continuance of work under F.E.R.A.

Forest Technician T. B. Plair continued at Zion on the preparation of the park vegetative type map. Authorization has been received from Chief Forester Coffman to extend Mr. Plair's detail to include preparation of similar map for Bryce and Cedar Breaks. Entomologist DeLeon, who arrived in March with Mr. Plair, completed his work here and departed on April 2.

125 Other Governmental Officers. On the 6th A. B. Purton of the Geological Survey made a routine inspection of our river gauge and stream records.

On the 15th Assistant State Administrator Rayburn and Mr. Benjamin Glassburn, Western Regional Representative of the C.W.A., accompanied by their wives, visited Zion National Park and inspected the Civil Works projects here. The party also visited Bryce on the 16th.

Junior Highway Engineer F. LeRoy Davis of the B. P. R. returned to Bryce on the 15th.

District Engineer B. J. Finch of the B.P.R. was in the park on the 26th to inspect road contract work in Zion. He also looked over the work completed to date on the Bryce Rim Road in Bryce Canyon National Park.

#### 140 Labor Situation

Public Works has been carried on with an average of 15 men, the former quotas being reduced as projects were nearing completion. Civil Works employees, averaging 20 men, continued to work until April 26 when all

projects were terminated, the archaeological project being kept at full strength of 15 men until the last week. The CCC camp has been built up with many new enrolled men and they have been doing good work. A number of men have been employed during the month of Zion maintenance, preparing for the summer season.

#### 170 Plans, Maps and Surveys

Location survey of Oak Creek and residential roads have been made and necessary engineering done to commence construction. Surveys have been completed on several other projects on which construction has terminated. Permanent monuments have been set throughout the floor of the valley and in Pine Creek, Oak Creek, and East Entrance areas. Surveys have been continued in connection with archaeological work in Parunuweap Canyon. Topographic survey of campground extension area at Bryce Canyon National Park has been completed and surveys of Under Rim Fire Trail are being commenced. Considerable office work has been done working up notes and preparing records of engineering done. Designs are being made of culverts for Oak Creek Road. The Landscape Division, in cooperation with the Engineering Division, has supervised the construction projects. The survey party has been reduced to one instrumentman and two rodmen.

#### 180 Publicity

The issuing of a weekly travel bulletin was started this month, approximately 100 copies being sent to auto clubs, hotels, newspapers, etc. This will be continued throughout the travel season. A sample copy is attached.

#### 200 Maintenance, Improvements and New Construction

##### 210 Maintenance

Zion. In addition to routine work on the roads and campground, a crew was started on spring trail maintenance, working on the valley trails and the West Rim Trail above Angel's Landing.

Bryce. Spring maintenance on Bryce roads was completed a month earlier this year than usual, due to rapid melting of snow. All main roads are now in good condition, and trail maintenance has been started.

##### 230 New Construction

#### Public Works Projects

Zion. Bids on employees residences and comfort station (JFP-16-17-18) received on the 16th were not awarded due to their exceeding the allotment. Recommendations are being made to award bids on two residences and one comfort station to lowest individual bidders.

Bryce. On the 14th the contractor resumed work on the Bryce Rim Road, grading section B2.

Status of other Public Works projects is shown under "Status of Authorized Projects".

#### Civil Works Projects

Outside of cleanup work to complete the various projects, there were no Civil Works construction jobs under way during the month. The archaeological expedition at Parunuweap Canyon, however, continued full force until the 19th, and terminated with 9 men on the 26th. Further details on this are given under paragraph 430.

#### Emergency Conservation Work

A full report of this work is being submitted separately, but your special attention is directed to the three outstanding jobs which are illustrated by captioned photographs attached hereto.

#### 240 Improvement of Approaches to Park

Regrading of the LaVerkin-Dalton Wash section of U-15 is progressing rapidly, but is causing an unnecessary amount of trouble to incoming park visitors. The detours are needlessly rough and dusty, causing many complaints each day.

#### 260 Landscape Work

A major portion of the landscape work has been devoted to supervision of various ECW projects so as to leave them in an attractive condition when the CCC camp is removed from Zion in May. Road sloping, lower campground, upper residential area, south entrance checking station, and Temple of Sinawava parking area have all been completed enough to present a pleasing appearance until planting can be resumed in the fall. The last two jobs - checking station and Temple of Sinawava - are illustrated at the end of this report.

#### 400 Flora, Fauna, and Natural Phenomena

#### 410 Ranger-Naturalist and Guide Service

Four hundred and ninety-five contacts were made during the month in spite of the fact that the naturalist was absent on official leave for seventeen days. No regularly scheduled trips or lectures were given, all contacts being in the museum or campground whenever an interested group could be assembled. Two student groups were given special attention: on the 1st a party of 15 forestry students from Utah Agricultural College, under Professor McGuire; and on the 29th another forestry group of 20 from Weber College, Ogden, Utah, under Professor A. R. Croft.

#### 420 Museum Service

Zion. The park naturalist and his wife spent six days at the Berkeley laboratories assisting with coloring of the Zion relief map. Casts of the map were still too wet for oil paint; hence it was possible only to use

fresco colors, doing a temporary job that will serve as a model from which other casts can eventually be painted in oil. An unpainted cast, with all necessary oil colors, was shipped to Zion to be colored here when the cast is dry. While at Berkeley we secured the printing of 46 Zion lantern slides, but were unable to get them colored under GWA. Other activities at Berkeley are listed under 460 and 470.

#### 430 Archaeology

The final reports on both the Arches and Parunuweap projects will be submitted on or before May 15.

To assist in completing the Parunuweap project the park naturalist spent four days (6th to 9th) on a reconnaissance trip with Mr. Wetherill, locating and surveying ten Pueblo sites. Also on the 26th and 27th he transported Mr. Wetherill and the sherds collected in Zion to the Museum of Northern Arizona at Flagstaff, where Dr. Harold Colton kindly donated the laboratory facilities necessary for preparation of the final report. Dr. Colton also extended this offer to cover the two or three month period required for preparation of a bulletin on Zion archaeological findings which he offered to partially finance.

#### 440 Insect Control

On April 1 caterpillars came out on the ash trees so thick that the trees were completely defoliated in 48 hours. A few caterpillars had been seen before that time, but we were unable to obtain a spraying machine. On the 11th we borrowed one from the State Agricultural Agent and for two weeks we tried to use it, but it was so badly worn out that we realized little good from the work. We then rented a larger one from Morris Wilson of LaVerkin, Utah, and kept it for one week, during which time we were able to spray all trees that could be reached between the south entrance and the Temple of Sinawava. The trees on the auto camp, the old Wiley Camp and at the Lodge were sprayed twice. Millions of worms were killed, and I believe we have them under control now, except in sections where a truck cannot be taken.

#### 460 Birds

##### Zion.

Large numbers of summer visitants arrived during the month, and several new records have been noted, including a Costa Hummingbird nesting in Oak Creek. Several Zion specimens were identified by Dr. Linsdale of the Museum of Vertebrate Zoology at Berkeley, and the entire museum staff gave considerable assistance to the park naturalist during his visit there.

Bryce. The following is quoted from Ranger Cope's report: "During the past two weeks I have been filling two bird baths with water and have been feeding the birds discarded bread from the CCC camp. It has worked wonders in keeping the birds around the station."

#### 470 Animals

While at Berkeley the park naturalist spent some time with Mr. Seth Benson of the Museum of Vertebrate Zoology, in studying and identifying Zion specimens. As a result of this study it has been possible to publish a preliminary check list of Zion mammals in the March-April issue of Nature Notes, 48 species being included in the list. Two species of meadow mice from Zion appeared to be different from any specimens at Berkeley and are being retained there for detailed study by E. Raymond Hall. The mountain sheep has gone to the hills again - he has not been seen for two weeks. The fence around the northwest boundary of the park is keeping the stray cattle away from the area, making several thousand additional acres within the park available for support of wild life. Deer never looked better than they do this spring.

#### 475 Geology

Dr. W. A. Setchell of the University of California has asked us to send him specimens of travertine, especially that formed in the presence of algae, to aid him in preparation of a U.S.G.S. publication on the subject. Dr. Setchell spent considerable time discussing such phenomena with the park naturalist, giving him a sound basis for popular explanation of travertine along the Narrows nature walk.

#### 500 Use of Park Facilities by the Public

##### 510 Increase in Travel

Comment has already been made on the gratifying travel increase, which gives every indication of continuing steadily throughout the summer. A certain percentage of the visitors represent an "overflow" from Boulder Dam, which is unusually well advertised.

##### 530 Visitors

April 2 - Assistant Park Naturalist Beatty and family of Yosemite, left for Grand Canyon after a four-day visit in Zion.

April 12 - Mr. and Mrs. R. A. Marble, who operate a photograph studio at Belton, Montana, spent a day here taking many pictures.

Mr. Frank M. Hull, sales representative of the Automobile Club of Southern California, visited the park during the month.

Stephen L. Richards, an apostle of the L.D.S. church at Salt Lake City, and family spent two weeks at the public auto camp. A church caravan from the L.D.S. church, consisting of 19 members, passed through the park en route to St. George on the 30th.

600 Protection

610 Police Protection

Zion. The south entrance has been kept open daily 13 hours. The east entrance was operated 8 hours each day, since the 15th. Collection of entrance fees was begun on the 2nd at Zion.

On April 2 Ranger Fagergren and the chief ranger arrested Cecil Henry who had been arrested and fined in Springdale for drunken and disorderly conduct but who left the country without paying a ten dollar fine imposed on him by the Justice of the Peace. They took him back to Springdale and the fee collected together with \$5 additional for contempt of court. Other minor infractions of rules were handled by disciplinary measures on the spot. The road contractor's trucks gave a little trouble in handling traffic, but cooperated well after being warned several times.

Bryce. It was necessary to warn the CCC authorities concerning proper conduct of men and visiting girls at their stub camp at Bryce, and establishment of strict authority was secured. This prompt action prevented any improprieties. A cut in the north boundary fence was discovered and repaired, but the trespassing riders (indicated by tracks) have not yet been found.

630 Accidents

No accidents of any consequence occurred within the park this month.

Very truly yours,

P. P. Patraw  
Superintendent
