**Significance:** South Pass marked the long looked-for crossing of the Continental Divide and the Rocky Mountains. To the emigrants of the forties and fifties it also signified their entrance into the Oregon Country. Although many miles of hard traveling lay ahead, many of the pioneers felt encouraged that their destination was indeed growing closer once South Pass was crossed. Joel Palmer interrupted the table of distances in his account with the words, "Here Hail Oregon!"\*

Located to the South of the Wind River range, in the sight of which the emigrants had traveled for many days, South Pass was both deceiving and disappointing to the travelers. Although its elevation exceeds 7,500 feet above sea level, it did not conform to the emigrant's picture of a Rocky Mountain pass. Some crossed it without realizing it. Elizabeth Wood thought the road on the summit to be as level as the streets of Peoria, her home town. William T. Newby expressed some disappointment. "If you didnt now it was the mountian," he wrote in 1843, "you woldent now it from aney outhere plane."\*\*
