Auxiliary Schooner Adventuress

**AUXILIARY SCHOONER ADVENTURESS**

This schooner, from the designs of B. B. Crowninshield, has just been built by the Rice Brothers Company for Mr. John Borden, of Chicago. She will be taken to Seattle, Wash., by way of Magellan Straits.

From Seattle she will start for a trip to Alaska and the Arctic Ocean next May, and if conditions permit, will go to Wrangel Island in search of big game.

Adventuress will carry a 21-foot Atlantic Company dory launch. A regulation New Bedford 28-foot Arctic whale-boat by C. D. Beetle, of New Bedford, with full equipment of guns, lances, etc. A Hiram Lowell & Son (Boston) haddock dory and a 10-foot dinghy.

For auxiliary power she is equipped with an 80-h.p. three-cylinder Standard engine, for which her fuel tank will carry a supply of 1,400 gallons of distillate.

Electric lights will be supplied by an Edison storage battery, charged by a 5-h.p. engine and an Eck generator direct-connected. This generator will also furnish current to operate a refrigerating machine and an engine bolted under deck forward to operate the windlass.

General dimensions are:

Length o. a. ....	101 feet 10 inches
Length w. l. ....	71 " 2 "
Breadth ....	21 " 0 "
Draught ....	10 " 6 "
Displacement ....	98.2 long tons
Ballast, outside. ....	18 " "
Ballast, inside. ....	12 " "
Sail area (four lower sails) .....	4,571 square feet
