Until recently, Samoan parochial schools were oriented toward providing a supply of pastors and/or pastors' wives. Schools were conducted in the Samoan language and stressed religion, but some secular subjects were included. Boys also learned some Western manual arts, (con't. on 10-300a)

## 8. Statement of Significance

and girls also studied Western hygiene and domestic arts.

The London Missionary Society, most frequently called LMS, was first into Samoa and had a system of village schools, secondary schools, and a seminary established by 1844. Other organized religious groups which followed into Samoa never reached the coverage in adherents or schools achieved by the LMS. Tutuila, the main island of what is now American Samoa, had resident Roman Catholic priests in 1867. Missionaries of the Latter Day Saints came in 1888 and Wesleyan in 1901.

In the dominate LMS system, before 1855 for boys, and 1900 for girls, graduates of village elementary schools chosen for higher education usually as pastors or pastors' wives left their home villages or islands for secondary and/or seminary training at IMS schools on Upolu Island, Western Samoa. Disruption of close Samoan family ties during the absence of students was a factor in opening secondary schools, one for boys and one for girls, on Tutuila Island.

Fagalele Boys School was the Eastern Samoa district secondary school of the IMS, the first (1855) in Eastern Samoa and the only one until 1900. It served selected graduates of village schools from the island of Tutuila and the islands of Manua, now part of American Samoa.

Preministerial in orientation, boys attended for two or three years before being admitted to the seminary at Malua. In 1926, the subjects taught included Religion (Church History, Scripture History, the Disciples and "International Lessons"); English (taught only at Fagalele -- the other LMS district secondary schools did not include this language); Geography, Arithmetic, Samoan Grammar and Composition. The boys also ran the associated farm lands.

Fagalele Boys School was closed during the 1926 census conducted by the Navy. The schoolmaster in residence then was Fa'amasani. The fact that boys were not in residence at the time of the census (nor were girls at Atauloma) was believed responsible for the decrease in population in the Western District of Tutuila Island. Other districts of American Samoa It is believed the school reopened, or classes were recorded increases. resumed, later. Final closing date of the school is unknown.

Detailed information on Fagalele is believed to be in the files of Malua College, Upolu, Western Samoa. A document search there by a historian proficient in the Samoan language is needed.
