

1 of 18

Cronise Studio photo, 1886
Showing typical trabecated
openings and casement windows

in south elevation fronting
Court Street. Note also
canopy carried on wooden
framework sheltering walk
at street corner. This
southerly 50 feet of the
block is no longer intact,
and is not included in the
nomination.

Cronise Studio photo, undated (ca. 1890s), showing full scope of 120-foot Commercial Street facade. Northerly 10 bays are the subject of the nomination. Southerly 7 bays no longer intact.

This photo is best available documentation of the original appearance of the brick masonry building, including continuous bracketed cornice, matching bracketed window cornices, and display windows and doors revealed behind arcaded cast iron ground story front.

FEB 14 1979

Historic view, February, 1937,
"the great snow." Note
remodeled store front of
northerly four bays. Metal

cornice and window cornices
had been removed by this time.
Today, only the southerly
six bays of the large block
adjoining the Starkey-McCully
Block on the north remain
standing.
