DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

The Cornell College/Mount Vernon Historic District is composed of approximately 120 buildings and structures, and is located on the west side of Mount Vernon. The campus of Cornell College forms the heart of the district (and occupies about three-fourths of the land area). The majority of college buildings are arranged along and around the Mt. Vernon paha, a hill in the midst of a low and rather flat valley about 10 miles long. Framing the campus on the west, southeast and northeast are some 70 houses and related outbuildings that comprise the remainder of the district. They range in age from the 1850's to the present, and display a full sampling of midwestern domestic architectural forms, materials and styles, the latter including the Greek Revival, Italianate, Second Empire, Queen Anne, Stick, Gothic and neoclassical revivals, and the craftsman.

The main "entrance" to the district is at the east end, at the intersection of S. 3rd Ave. and 1st Street. Here, two large stone churches, Presbyterian and Methodist, face one another like sentinels across 1st Street. They act as strong transitional elements between the commercial area to the east, and the college/residential area to the west.

Like the residential portion of the district, the Cornell campus contains buildings from the mid-19th century to the present, that illustrate the growth and development of this institution over time. The dominant visual element here is King Chapel, visible at several miles' distance from all the highways leading into Mount Vernon. The hill top is the focal point of the campus, with almost all structures located along the ridge. Campus buildings are scattered along a 5 block area and arranged at random about the hill top. One walk links the entire campus. All vehicular traffic is prohibited on the campus and only the main walk serves as a direct fire access. Three short streets permit fire equipment to serve the campus on the edges. The north slope of the hill is wooded as is a small portion of the western slope.

All of the structures are still being used for the same general purposes as at the time of their construction. Some houses are used as dormitories. An old hotel is being converted to apartments and a large house used as a clinic by a physician couple is now a funeral home. Another house is now faculty offices or used by administration.

All of the buildings are in good to excellent condition. Recent work by the college has taken account of the historical character of the buildings and efforts made to preserve that character. Private residences in the area are very well kept and only a few additions or modifications have been made to them. Owners are generally willing to retain the houses as built. Several small barns have been converted to garages and only a few new garages have been constructed.

BUILDER/ARCHITECT

STATEMENT OF SIGNIFICANCE

The Cornell College/Mount Vernon Historic District, with its mixture of institutional and residential architectural forms ranging from the 1850's to the present, offers an excellent look at the growth and change of a small academic community over time. The buildings within the district display a high degree of physical integrity, and represent a broad range of architectural forms, particularly those of the mid and late 19th century. Although the campus forms a discrete unit within the district, direct relationships exist between it and the residential areas. One relationship is, of course, proximity: the houses act as a "frame" around the tree-shaded expanses of the college. Another is a temporal and architectural relationship, in which the development of the college and its residential surroundings is graphically illustrated by the gradual change in architectural styles over time. There is also the opportunity to examine several examples of a particular style, and to observe the adaptation of that style to uses both residential and institutional (and, in one case, commercial). The best examples of this are the Greek Revival Old Sem (23), Fellows House (113) and Old Presbyterian Church (71); the Gothic Revival King Chapel (24), Methodist Church (52), Bowman Hall (25) and Boyd House (73); the Second Empire former Mount Vernon House hotel (54) and Hogel House (55); and, from the late 1930's, a house (69) and Armstrong Hall (5), which demonstrate the popularity of colonial revival forms long after they had ceased to be architecturally creative.

Another interesting relationship is that between the Methodist and Presbyterian Churches (52, 51) and King Chapel (24). All three are large ecclesiastical edifices of rockfaced limestone, with corner towers and consciously medieval characters. The first two act as very effective markers at the eastern entrance to the district. In this sense they are an "introduction" to a visual theme climaxed by King Chapel at the heart of the district. This district center also contains the most visually arresting arrangement—6 buildings ranged along the crest of the hill (20, 19, 22, 23 24, 25).

The boundaries of the district have been drawn to include the whole of the college, and the residential areas that are oriented, visually and historically, toward the campus. Buildings rated "A" are those that may be considered pivotal from an architectural, historical, and/or visual viewpoint. "B" structures are those which do not display outstanding qualities individually, but collectively contribute materially to the character of the district. Buildings rated "C" are all less than 50 years of age; it is understood that insufficient time has elapsed to provide a proper historical context for their evaluation. Most of these C buildings fall into three groups. One includes modern ranch houses, principally from the 1950's and 1960's (for example, 89-92). Another consists of college buildings (7,8,12) designed by Green and Co. of Cedar Rapids in the 1950's, perhaps best described as very late

Colonial Revival/Williamsburg vernacular. From an albeit limited perspective, in terms of time, these buildings do not appear to have much architectural distinction. they are in the principal stylistic tradition of Cornell College architecture, established in the 1850's with Old Sem, and carried through the 1930's in various revivalistic expressions of colonial and classical forms and details. The third group of C structures are college buildings from the 1960's and early 1970's (6.9.11.15.28.29) designed by Harry Weese and Associates of Chicago. frankly modern, yet achieve a compatibility with the older buildings that is not always the case on college campuses. Four of these (9,11,28,29) are dormitories, faced with brick and scaled to match surrounding buildings. #9 and 11 join with #10 in creating an interesting dormitory enclare on a promontory at the southwest edge of the campus. 28-29 are not linked visually with other campus buildings, as they are somewhat apart from them. The view of their strongly vertical facades marching down a hill on the western edge of the campus can be striking. #15, West Science Center, is the only one of the Weese buildings to consciously evoke the design traditions of an earlier time, principally through the use of a shallow-pitched gable roof and enormous slab lintels of stone.

In summary, the C structures of the district cannot simply be considered "intrusive", except, perhaps, on the grounds of age; rather, they stand as late elements in a continuum of architectural expression that is one of the chief characteristics of the Cornell College/Mount Vernon district.

The town of Mt. Vernon was platted in 1847, in an area where white settlers had arrived as early as 1836. The "town and gown" relationship was established only 6 years later, when the lowa (Methodist) Conference Male and Female Seminary erected its first building (now "Old Sem", #23). In 1885, the institution was renamed Cornell College, and College Hall (#19) opened in 1857. The last major event of the 1850's was the coming of the Northwestern Railroad to Mt. Vernon in 1859.

The community's economy, established in the 1850's with such ventures as a sawmill, brick kilns, a wagon factory and a hotel (Guild Hotel, 1853, #54) expanded in the post-Civil War period to include tile and furniture factories and a pottery. Cornell contributed its share to the town's prosperity, as did the adjacent rich farmlands that supported cattle, hogs, and feed grains.

As the town's first boom period (the 1850's) was reflected in the many brick houses built then (#113, 37), so a second period of growth (c. 1885-1900) resulted in a large number of sizeable frame residences (for example Rood House (#42), Albright House (#41), Stoner House (#43), and Benesh House (#66)) and additional college facilities (Bowman Hall (#25), King Chapel (#24)).

PAGE 3

In the early decades of the 20th century, residential construction developed around the western end of the Cornell campus (heretofore most houses were built to the east and north), and resulted in the breaking-up of farms there.

The Depression years were not, relatively speaking, terribly hard on Mount Vernon and Cornell College. For one thing, the drouth and grasshoppers that plagued western lowa did not seriously affect the Mt. Vernon area, so local crops remained good. Federal assistance programs created local jobs building the water tower (#48) and developing Palisades Park southwest of Cedar Rapids. In these years, surprisingly enough, Cornell College embarked upon a building program. During the 1930's were erected Pfeiffer (#10), Merner (#36), and Armstrong (#5) halls, additions were made to Bowman, and Old Sem was remodeled. These projects thus contributed substantially to the stability of Mount Vernon's economy in the years before World War II.

The 1950's and 1960's saw continued expansion of the Cornell campus to meet the post-war population boom. As in the 1930's (with William Jay Brown), the later projects were the work of single architectural firms: Green and Co. of Cedar Rapids in the 1950's, and Harry Weese and Associates for the last, 1960's, phase. Today the College continues to be an anchor of the local economy and a strong influence on the town's cultural life. Since World War II however, Cedar Rapids industries have employed many Mount Vernon residents, and town is gradually becoming a bedroom community for that large city. However, Mount Vernon retains to a strong degree a character of its own, amply illustrated in the Cornell College/Mount Vernon historic district.

BIBLIOGRAPHY

Extensive research on college owned buildings has been done by members of the faculty and brought together in what is called "College Building File" (or B.R.F.) which is part of the College Archives. The File contains citations to Trustee Minutes, newspapers, recollections, and manuscripts.

Additional material used in the preparation of this nomination comes from the College Archives and includes special pictures files and issues of the college "annual" or yearbook. Microfilm copy of the various town newspapers from the 1860's forward are in the College Archives.

The City of Mt. Vernon has a Historical Committee which conducted a photographic survey of the town (1976) and maintains a collection of historic photographs in the City Hall.

In preparing the nomination a number of older citizens were interviewed. Mr. James McCutcheon served as the editor of the newspaper from 1923-67 and took over the paper from his father. He is a remarkable source. The area has a number of families who have written and oral material dating from 1845.

The following printed sources were used:

- A Centennial History of Mt. Vernon, Iowa: 1847-1947. The Centennial Committee, Hawkeye Press, Mt. Vernon, Iowa. 1948.
- The Fiftieth Anniversary of the Founding of Cornell College. The Lakeside Press, Chicago, Illinois. 1905.
- The History of One Hundred and Twenty-Five Years of Methodism in this Community: 1841-1966. First Methodist Church, Mt. Vernon, Iowa.
- Stancliff, Henry Clay, <u>A Century of Presbyterianism in Mt. Vernon, Iowa: 1843-1943</u>. Press of the Mt. Vernon Hawkeye Record, 1943.
- King, William Fletcher, Reminiscences. Abingdon Press, N.Y., N.Y., 1915.
- Keyes, Margaret N. 'He Left His Legacy in Landmarks,' The IOWAN, Winter, 1964.
- Schultis, Gail Ann, "A Survey of the Brick Homes of Mt. Vernon, Iowa, Built Prior to 1900", unpublished manuscript on file at the Cornell College Library.
- Thomas, Richard H. "A Brief History of Mount Vernon, Iowa", Cornell College Press, Mt. Vernon, Iowa, 1971.

VERBAL BOUNDARY DESCRIPTION

The Cornell College/Mount Vernon Historic District is an irregular area of land located on the west dies of Mt. Vernon, lowa, which may be roughly described as: Beginning with (and including) the bridge at N. 10th Ave. over the Chicago and Northwestern Railroad line, then east along the south edge of the railroad right of way to the center line of N. 8th Ave., then south on N. 8th Ave., then east along N. 8th Street, then south along the rear property lines of properties on the east side of N. 8th Ave., (crossing N. 7th St. and N. 2nd St.) then southeast along rear property lines of properties on the north side of 1st St., to N. 3rd Avenue. Then SW down center line of N. 3rd Avenue to rear property line of the Mount Vernon United Methodist Church. Then NE along rear property lines of properties on the south side of 1st Street to center line of N. 4th Ave. Then southwest to intersection of N. 4th Avenue and S. 4th Street. The NW along S. 4th St., crossing S. 5th Ave., and then NW along center line of College Boulevard to Summit Ave., then NE along center line of Summit Ave. to a point on the street in line with the rear property line of 730 Summit Ave. Then west along rear property line of properties on the south side of Summit Ave. to the SW corner of the property at 101 10th Ave., then north to 1st Street, then E to N. 10th Ave., then north along 10th Ave to bridge at beginning.
