9. Historical significance (include explanation of themes checked above)

Begun in 1921 and completed in 1923, the Aldus Higgins House is the most elaborate of Worcester's early twentieth century "period" houses. Although plans for the house were prepared by Grosvenor Atterbury of New York, Aldus Higgins is believed to have spent a number of years making sketches and gathering materials for the house prior to hiring Atterbury. Unlike two other major "period" houses in Worcester (Knollwood - Form 75-A - and the Paul Morgan House - in Lincoln Estate Form 116-L) the Higgins House is known to contain some antique European building materials. The house's entry facade consists of two wings (set perpendicularly to each other) containing a semi-octagonal entry tower (with crenellations) at the wings' junction. Throughout, the building is constructed of various materials, following the general pattern of stone (1st storey), half-timbering with brick panels (2d storey) and half-timbering with stucco panels (gables). The building's garden facade (south) also is made up of two wings, joined at right angles by a two-storey gabled pavilion which contains a two-storey window with ornate tracery. Set behind this window is the house's "Great Hall", a two-and-one-half storey room containing panelling, ornately carved woodwork and a mantelpiece which was originally part of the roof of an Italian monastery. At the hall's second storey is a balcony and organ loft. Many of the house's leaded casements and stained-glass windows were bought in Europe and shipped to the United States after World War I. Other features of the house's exterior include ornate chimney pots and elaborate foliate decoration in the stucco of the half-timbering. Of much smaller scale, the garage bears the same design elements as the house. Connecting the two

INVENTORY FORM CONTINUATION SHEET

MASSACHUSETTS HISTORICAL COMMISSION
Office of the Secretary, Boston

Community: Worcester	Form No: 102-M
Property Name: Aldus Higgins House	

Indicate each item on inventory form which is being continued below.

9.
structures and surrounding the house are original garden walls, gates and terraces. Shortly after its completion, the Higgins House was the subject of an article in Country Life in America (March 1926, p. 57-59)

Aldus Higgins (born 1872) was a son of Milton Prince Higgins, a founder of the Washburn Shops at Worcester Polytechnic Institute and a founder of several major local industries, including Norton Company, the Plunger Elevator Company and the Norton Grinding Company. The younger Higgins attended Worcester Polytechnic Institute, from which he graduated in 1893. From 1893 until 1896, Aldus Higgins studied law in Washington, D.C., also serving at this time as an assistant examiner in the United States Patent Office. In 1896 Higgins was admitted to the bar, and after an extensive trip opened a law office in Worcester in 1897. Eventually Higgins gave up his private practice to serve as general counsel in the Norton Company, during a period of growth and re-organization of the firm. Higgins eventually became the company's president, also serving as treasurer of the Sanford Alley Stoker Company.

Excellent multiple resource nomination for the entire city of Worcester. Both the general description & statement of significance & the individual inventory sheets are well done. Each type of property included is well justified, & reasons are listed for not including others at this time (e.g. 3-deckers). **HISTORIAN**
Call/Accept
Lightner
10.30.79

Minor problems w/ some properties are listed on attached sheets. **ARCHITECTURAL HISTORIAN**

Concur with Bruce's comments on 102-L-3, 116-CBD-11, 117-E, and 130-CBD-50 and 44. Integrity and/or boundaries need to be addressed specifically on individual forms. **ARCHEOLOGIST**

116-CBD-11 - Destroyed, cannot be listed.
130-CBD-44 - I am not convinced this has lost integrity. See attached.
102-L-3 - Period of significance and categorization of bldgs need to be discussed with State.

With 3 exceptions all properties appear to me to meet the criteria and the forms are adequate. **OTHER**
ACCEPT
MURPHY
2/28/80

Both technically and to determine significance, although some of the forms did not contain strong statements of significance the resource categories were thoroughly discussed in the body of the nomination; therefore significance was established. **HAER**
Inventory _____
Review _____

Boundaries were not necessary because of the scale maps and clearly delineated boundaries. **REVIEW UNIT CHIEF**

Accege was missing on some properties but is now included after the 2/11/corrections. **BRANCH CHIEF**
The only properties that I do not recommend listing are:
✓ 116-CBD-13 - DESTROYED BY FIRE MD - 116 CBD - 11
130-CBD-44 - DOES NOT RETAIN INTEGRITY FOR INDIVIDUAL ELIGIBILITY
✓ 102-L-3 I ~~am~~ ^{am} not convinced about boundaries BUT BELIEVE THEY COULD BE OK. BASED ON ADDITIONAL DOCUMENTATION SUBMITTED - I DEFER JUDGEMENT.
Recommend listing all properties ^{now} except these 3. Return 116-CBD-11 to State (not eligible); ~~to discuss further~~ w/ NR staff + State. **KEEPER**
Return 102-L-3 to State for correction;
HOLD 130-CBD-44 for info from State
3/5/80
DUBIE

Staff conference 3/5/80 - agreed to action as noted below:
Accept with exception of 116-CBD-11 (official notification of fire & clean from State), 102-L-3 (returning to state for revision - also returning 116-CBD-11) and 130-CBD-44 (eligibility from state) **KEEPER**
