

SUPERINTENDENT'S MONTHLY REPORT

FOR

JUNE, 1927

W.B.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
YOSEMITE NATIONAL PARK

OFFICE OF THE SUPERINTENDENT

CALIFORNIA

July 6, 1927.

Director
National Park Service
Washington, D. C.

Dear Mr. Director:

I am transmitting herewith report on Yosemite National Park for the month of June, 1927.

000 General

June was an average month, the 1st and 2nd being stormy, and rain fell on the 7th, making a total of .96 inches for the month. From that time on the weather has been clear and warm.

The closing of schools about the 15th of the month brought in hundreds of campers, who are staying from one to three weeks, as compared with the week-end campers that we received during May.

100 Administration

110 Status of Work

The increase in business in every department of the park organization, due to the great increase in travel, has brought new problems and more work to be handled. The splendid control furnished by the new accounting system showed that we would be able to expand our activities somewhat toward the end of the month, and, consequently, ten or fifteen laborers were put on in the departments where they were most needed, and, also, some supplies and equipment were bought, the purchase of which had been deferred until we could determine how we were going to come out at the end of the year.

120 Park Inspections By:

121 Park Superintendent

The Superintendent has made frequent inspections of operations on the floor of Yosemite Valley and along the El Portal Road. Inspections have been made, also, of all the mountain roads except the Tioga Road, which was not open, including operations at Hetch Hetchy, Glacier Point, and the Mariposa Grove of Big Trees. A special trip was made to the area involved in the proposed exchange between the Government and Best and O'Connor.

125 Other Governmental Officers

District Engineer Sweetser of the Bureau of Public Roads spent two days in the park, beginning June 24, inspecting contract work. The matter of the Yosemite road budget was gone over in some detail with Mr. Sweetser.

Highway Engineer Frank Kittredge arrived in the park on June 28 to inspect the various roads covered in the Yosemite road budget. On the 29th, I accompanied Mr. Kittredge on a tour of inspection of the road situation on the floor of the Valley and also on the El Portal Road. On the 30th, Mr. Kittredge, Engineer Taylor, and I went over the Wawona Road relocation.

127 Other Agencies

Mr. Britton, Division Commercial Agent of the Pacific Telephone & Telegraph Company, whose headquarters are in Sacramento, California, visited the park with Mr. Barrier on June 5. Mr. Barrier is connected with the American Telephone & Telegraph Company, with headquarters in New York. On June 30 Mr. Britton was again a visitor to the park.

Russell H. Stalnaker, Equipment Engineer of the California Highway Commission, Sacramento, called on June 4.

On June 4 Harvey Monroe Hall of the Carnegie Institution of Washington, who is also associated with the Department of Botany of the University of California, called at the office.

130 Finance and Accounts

The Uniform System of Government Accounting, which has been in successful operation for the past several months, proved its value during the month of June. From our allotment ledgers we were able to determine from day to day just what expenditures had been made and what the available balances were, so that the park work could be successfully handled. The system worked to perfection in giving the Superintendent the necessary administrative control, and the general situation was in striking contrast to the situation which existed last year and in prior years in June, when heavy travel to the park brought on additional demands and expenses which had to be met, all of which caused a great deal of worry and labor because of the difficulty in knowing exactly what the status of our appropriation was. Special temporary cost accounts were established on those jobs that had fixed limitations, so that by securing the material and labor charges daily it was possible to stop work on the jobs when the available funds were exhausted.

The year has ended with a reserve balance of \$1,000 or \$1,500, to be on the safe side and to meet any additional or unforeseen expenses and to take care of encumbrances that may have been too conservative.

It will be of interest to know that our pay checks covering service for the month of June were all out and ready for delivery to employees on the evening of July 1.

140 Labor Situation

There has been no difficulty in recruiting the number of laborers required for the general park work.

150 Equipment and Supplies

The most important equipment purchased during the month consisted of two Dodge trucks, one for the use of the Maintenance Department and the other a general utility truck for the use of several department heads.

170 Plans, Maps, and Surveys

The engineer spent the month in preparing small designs, drafting, surveying, mapping, etc., while the Engineering Draftsman spent the month in drafting, blue-printing, and helping with surveying and mapping.

The Bureau of Public Roads continued their survey work on the roads on the floor of the Valley.

200 Maintenance, Improvements, and New Construction

210 Maintenance

The usual maintenance, repair, and operation work was carried on during the month. The roads on the floor of the Valley were kept in fair condition, in spite of the heavy traffic, and sprinkling was started on the Valley floor roads, as well as on the lower end of the Wawona and Big Oak Flat grades.

The road from Chinquapin to Glacier Point was opened June 10. The Mather Station Road was opened and repaired during the month, and, when this was finished, the detachment was transferred to the Tioga Road. A 13½-ton truck of the Gilmore Oil Company, hauling oil for the California State Highway Commission for oiling the Tioga Road outside the park, broke through the bridge on the Middle Fork. Temporary repairs have been made, but the bridge must be entirely replaced next fall. The replacement of this bridge will be a heavy expense. Repairs on the Tioga Road are progressing favorably and by the end of the month the road had been opened as far as Yosemite Creek.

230 New Construction

(a) Detention Building: The area for this building was graded during the month.

(b) Comfort Station: No work was done during June.

(c) Two New Cottages: One building was practically completed during the month and the interior painting was begun. One-third of the finished carpentry has been completed in the second building. The exterior of both buildings has been stained.

(d) New Hospital: Considerable work has been done on the plans for this building, but they are still being studied.

(e) Ahwahnee Hotel: The building is about completed, and will be formally opened about the middle of July.

(f) Road Grading: The grading contractor has finished the grading of the Camp Curry Road from its beginning at Sentinel Bridge to the intersection with the North Road one-half mile below Mirror Lake, except for the sections through Camp Curry and at Happy Isles, which have been eliminated from the present contract. Rough grading is completed on the Clark's Bridge Road, North Road, "B" Line Road, Middle Road, and Hotel Stub Road, except for a few sections where considerable borrow material is yet to be placed. Grading of the south road from the Old Village to Pohono Bridge is nearing completion and should be finished about July 15.

(g) Road Paving: The paving contractor has placed the base course for about two and one-half miles from the Old Village towards Pohono Bridge on the South Road. The top course rock has been placed for about two miles on this road. The contractor was to start applying asphalt on the pavement about July 5, and a portion of the road is to be opened to traffic at an early date.

300 Activities of Other Agencies in the Park

310 Public Service Contractors

The main hotel building at Glacier Point was opened when the Glacier Point Road was opened on June 10. At the same time, automobile service to Glacier Point was established by a special car running from Yosemite Valley to Glacier Point and return and also by regular service furnished through the Horseshoe Route.

The Little Yosemite High Sierra Camp was opened on June 15, and the Marced Lake High Sierra Camp was opened June 15.

400 Flora, Fauna, and Natural Phenomena

420 Educational Work

Publications: The June number of "Nature Notes" was produced and mailed, regular postage being paid on all numbers sent through the post office.

Museum:

(a) Visitors: Throughout the month, visitors were entertained from 8 a.m. to 5 p.m. daily. The great crowds that have thronged the building almost every day have demonstrated that the exhibit space is much too small. Occasional counts of visitors entering the museum lead to an estimate of approximately 65,000 people. About 5,000 visitors were entertained at the Glacier Point Lookout.

(b) Library: The County Librarian, Mrs. John Wegner, has been in attendance three times weekly, as in the past. On June 20 Mrs. H. J. Taylor of Berkeley volunteered to remain in attendance in the museum library, and from that time on the museum library has been open to visitors each afternoon from 1 to 5 p.m.

(c) Installations: A collection of about 100 Yosemite fungi, all properly identified and labeled, was received and installed during the month.

The flower show at the museum has been maintained by the nature guides, and there is an exhibit at Camp Curry, also. At Glacier Point an exhibit of vegetation and flowers has been maintained.

Boxes of live reptiles and amphibians have been placed on the back porch of the museum. The eight species (including the rattle snake) have aroused great interest.

(d) Accessions: Chief Naturalist Hall obtained 337 books from the Veterans' Bureau.

The Sierra Club presented the original record of the first ascent of Mount Conness, dated September 25, 1878.

Two copies of the booklet, "Journeys to the Homes of Famous Californians", were received from L. L. McCoy. Mr. W. H. Martin gave a very valuable twelve-volume set of the Century Dictionary. Frederick E. Clements presented a reprint of his National Geographic article, "Wild Flowers of the West".

Miss E. E. Morse gave a splendid collection of about 100 Yosemite Fungi. The specimens are accompanied by labels and photos.

Biennial report (1901-1902) of the Commissioners to manage Yosemite Valley was received from the California State Library. The reports of the above-mentioned Commissioners for the years 1890-96 were obtained from Dr. G. T. Clark of the Stanford University Libraries.

Mr. M. Hall McAllister gave samples of the steel posts and outfit which were models of the cable trail on Half Dome. He also presented a large picture of the cable in place.

The books, "How Animals Work" and "From Out the Dark Shadows", were given by Mr. Fred Krause. Ranger R. R. Crawford gave the skull of a mountain lion that he killed in the Run River district near Fresno in 1923. Several bird and mammal study skins were prepared by D. D. McLean and H. C. Bryant.

(a) Nature Guide Service

Field Trips: The eight staff members have conducted the usual full schedule of twenty-six short trips each week, the weekly full-day trip to the rim of the Valley, one three-day trip to Merced Lake, one two-day trip to Glacier Point and the Pohono Trail, and two special trips on the Valley Floor to accommodate the Boy Scout Organization. The Yosemite Park & Curry Company has furnished splendid co-operation in the way of issuing printed pamphlets outlining the educational work, and announcements of the work are made each night to the large crowds that gather at Camp Curry and Yosemite Lodge for the evening programs. The advertising of this service has resulted in larger crowds on each of the trips, and on several occasions an extra guide has been sent to assist in conducting the trips. The largest group met by any one guide was 112 persons. On Wednesday, June 12, 212 individuals from the various starting points went afield with the nature guides. Special trips for children were instituted on June 27, and special bird and flower study trips have been featured.

The Glacier Point service has brought better results than ever before. In addition to offering field trips, lectures are given each night at the Glacier Point Hotel, and a nature guide remains in attendance at the Lookout for three hours daily.

Statistics for the month show a total of 142 trips, with a total attendance of 3,358.

Lectures: Park Naturalist Carl P. Russell, H. C. Bryant, D. D. McLean, D. G. Yeager, G. C. Ruhle, S. Aldous, and Robert Hays have all given lectures during the month. The ability of this number of staff members to satisfactorily address Yosemite audiences means that the burden of evening talks will no longer fall on two or three members. Talks have been given at Glacier Point every night, several times daily in the Geology Room of the museum, and special lectures from time to time on special subjects.

New Fish Hatchery: The educational work has now been extended to the new fish hatchery, recently completed at Happy Isles by the California Fish & Game Commission. Hundreds of people visit the structure every day, and a nature guide meets and talks to as many as possible. After a trial of one month, it is possible to report that true educational opportunities are presented here and that the work done by nature guides in meeting fish hatchery visitors is now a plane with other educational department activities.

Statistics for the month show a total of 179 lectures, with a total attendance of 32,413.

(f) Yosemite School of Field Natural History: The third session of this school started on June 27, with eighteen students (three men and fifteen women) enrolled, all of whom, with one exception, are Californians. These men and women are all well-equipped with college experience, and indications are that the same standard of work will be maintained as in previous years. Dr. Bryant, Ph. D., is responsible for the organization of this work and is in charge of the class.

On June 27 the students were met by Dr. Bryant and the Park Naturalist and given perspective of the work that is before them. The Park Superintendent expressed the welcome of the National Park Service.

The subjects of life zones and distribution (Bryant), Yosemite geology (Russell), and a visit to the Upper Sonoran Zone, El Portal (Bryant), were given during the opening days of the course. It is planned that each member of the educational staff will have an opportunity to conduct field work with the class, if not actual instruction of some subject matter.

It might be mentioned that a member of the 1926 class, C. A. Harwell, is this year a valuable member of the nature guide staff.

(g) Observations: A new high mark in the way of total number of visitors served was attained during June, due in part to the greater number of park visitors and in part to more efficient advertising. The Yosemite Park & Curry Company has co-operated by paying the salary of a nature guide for full time work in the Educational Department. A full schedule of work now keeps every staff member busy. With the opening of the new Ahwahnee Hotel about the middle of July, it will be necessary to ask even more of nature guides, and a readjustment of the present schedule will be necessary.

The administrative work necessary in keeping the many activities coordinated increases steadily. The lack of full-time clerical assistance was keenly felt by the Educational Department, and provision for a clerk-stenographer-typist has been requested and is now before the Service for consideration.

A new Dodge truck was made available to the Educational Department on June 24, and provides transportation that was badly needed.

500 Use of Park Facilities by the Public

510 Increase in Travel

During the month of ^{May} May, we had 17,049 cars enter the park (first entry), and 10,151 return cars. With 24 motorcycles, this made a total of 27,224 motor vehicles for the month, carrying a total of 87,285 visitors. This compares with a total of 14,653 motor vehicles during June of last year, carrying 46,109 visitors. The total motor vehicle travel to date is 66,314 cars, carrying 214,246 visitors, compared with 21,948 cars last year, carrying 68,445 visitors. The increases to date this year over last year are also interesting:

Cars, first entry	245%
Cars, re-entry	132%
Motorcycles	279%
Total motor vehicles	202%
Persons entering via motor vehicles ..	216%
Persons entering via other private transportation	58% Loss
Total persons entering via private transportation	213%

Under the heading of "Other Transportation", there is a gain of 99% in persons entering via stages and a loss of 33% in persons entering via trains. To the end of June, we have had a total of 234,855 visitors, compared with 86,231 visitors last year, which is a gain of 148,624 visitors to date, or 172%.

In our public camping grounds 8,142 automobiles have registered this year, compared with 4,154 last year, or a gain of 3,988, or 96%, while the campers in the public camping grounds on the floor of Yosemite Valley to the end of June have totaled 26,598, compared with 12,463, or a gain of 14,135, which is 113%. This information is given here in detail as June is the end of our fiscal year and the data is both interesting and valuable.

520 Weather Conditions

A copy of the report of the Weather Bureau for the month of June is attached.

540 Visitors

Governor C. C. Young of California was a visitor to the park from June 8 to 11. Considerable personal attention was given to Governor Young, and he had an opportunity to quite familiarize himself with all park operations, both from the standpoint of the Government and the public utilities, and with park problems. He showed a keen interest in the park and its problems and indicated in every way a full desire to cooperate with the Government in mutual problems between the State and the Government. He was, of course, particularly interested in the hatchery layout, and is particularly desirous of having this a first-class layout. He pointed out the desirability of discontinuing largely the policy of planting small fry in the various streams and substitute the practice of rearing the fry to finger length in rearing ponds before planting. The California Fish and Game Commission are preparing plans now for the construction of at least two rearing ponds this fall, these to be ready for operation by the coming spring.

Senator Moses of New Hampshire arrived at the park on the evening of June 20 and left on the morning of June 21. Senator Moses had two days' reservations in Yosemite, but for some reason or other did not avail himself of the reservation and stayed only one night, with the result that no contact was made with him.

Mr. George Frederick Kunz, President of the American Scenic and Historic Preservation Society, visited the park on June 22. He spent only two or three hours in the Valley, of which some twenty or thirty minutes were spent with Park Naturalist Russell in the Yosemite museum. Mr. Kunz had an engagement in Los Angeles, so that he had only a very few hours in the park. Consequently, he had practically no opportunity to discuss or come in contact with park matters.

Dr. Herbert S. Brown of the Olivet Presbyterian Church of Bridgeport, Connecticut, arrived on June 22 and left via Glacier Point and the Big Trees on June 26. Dr. Brown called on me for a half hour's chat on the 25th, and assured me that his visit to the park was a very enjoyable one.

Professor Albrecht Penck of the University of Berlin and his assistant, Dr. Haushofer, arrived in the park June 3. They visited Glacier Point on June 4 and left the park on June 5. Professor Penck for many years has been Professor of Physical Geography at Berlin and is the leading authority in Europe today on the subject of surface geology.

Mr. and Mrs. C. K. Berryman and daughter, of Washington, D. C., together with their friends, Mr. and Mrs. E. H. Day of Riverside, California, arrived in Yosemite on July 9 for a one-day visit. They brought a letter of introduction from Secretary Work.

Colonel H. Benchhoff, President of the Shenandoah Parks Association, and Mr. Huston Newman, of the same organization, arrived in Yosemite on the morning of June 29 with a party of 103 persons. The remainder of the day was devoted to sight-seeing in the Valley. On June 30 the party motored to the Mariposa Big Tree Grove, returning to Camp Curry late in the afternoon for dinner. They departed the same evening from Camp Curry for their train at El Portal.

600 Protection

610 Police Protection

<u>Offense</u>	<u>Arrests</u>	<u>Convictions</u>	<u>Acquittals</u>	<u>Fines</u>
Speeding	5	5		\$ 85
Theft	3	2		50
		1 Case Pending		
Disorderly Conduct and Intoxication	4	3	1	200
Possession of Liquor	3	3		60

The most important case was the arrest of Harold L. Coleman on June 19 for intoxication and transporting liquor. The complaining witness was Chief Ranger Forest S. Townsley. This man was a bootlegger and had been operating in the park. He was fined \$180, sentenced to the Alameda County Jail for ninety days, and his automobile was confiscated.

900 Miscellaneous

Medical Service

During the month of June, Dr. G. A. Hunt handled a total of 567 cases, answering 1,023 office calls and 47 house calls, or a total of 1,070 calls for the month. There were two minor operations performed. There were seventeen hospital cases, covering park employees, for a total of 54 hospital days, and 23 private cases for a total of 94 hospital days. There were two deaths in the park: Edward Stanzel of San Francisco, and Walter R. Snell of St. Helena, both of whom died from heart disease.

Publicity

A statement was issued late in May relative to the free public use of the Hetch Hetchy and Lake Eleanor regions, the story appearing in the various newspapers of the state as far north as Marysville and as far south as San Diego. Twenty-seven clippings were received on this article.

A request was received from Mr. Neal S. Anderson, Automotive Editor of the San Diego Union-Tribune, for a front-page story and pictures on Yosemite National Park, which request was answered by a 1500-word story and ten pictures.

Mr. Don V. Nicholson, Editor of Motor Land, a monthly publication of the California State Automobile Association, asked for an illustrated article during the past month on the new Ahwahnee Hotel, for publication in his magazine. A twenty-four hundred word article and suitable pictures were forwarded to Mr. Nicholson on June 25.

In answer to a request from Mr. W. E. Metzger, Secretary of the San Joaquin Tourist and Travel Association, for a park representative to speak over radio station KPO, San Francisco, in a program sponsored by his association, Information Ranger J. V. Lloyd was detailed to this duty. The event took place on June 22 during the noon hour, and the results were very gratifying, according to a later report received from Mr. Richard Shaffer of Merced, President of the Association.

Photography

During the months of May and June 144 contact prints, size 5" x 7", showing oiling operations along the new All-Year Road, were sent to Dr. L. I. Hewes and Mr. Walter Frichstad of the Bureau of Public Roads at their request.

On June 1 ten negatives were exposed to show the reforestation of the Chinquapin area following logging operations. A total of 32 prints were made from these negatives and sent to the Director in Washington.

At the request of H. T. Sherriff, Managing Editor of the Western Plumber, eight pictures depicting park sanitation measures were sent him for publication in connection with material supplied Mr. Sherriff by Resident Engineer O. G. Taylor.

Twenty-four pictures showing the Memorial Day traffic conditions in the park were printed for official use.

Attached as a supplement to this report are seven pictures, as follows:

- (a) The south end of the Ahwahnee Hotel.
- (b) A feature of the room construction - the Tyrolean three-drawer built-in closet shown in the center.
- (c) Interior, showing furnishings in one of the bedrooms. The finest furnishings from every quarter of the world have been brought to the Ahwahnee.
- (d) Governor C. C. Young at Valley View in Yosemite Valley, attempting to lure the elusive rainbow trout from the Merced River.
- (e) Governor C. C. Young of California and Superintendent Lewis discussing the operation of the recently completed fish hatchery at Happy Isles.
- (f) Yosemite Falls mirrored in one of the quiet pools below the Old Yosemite Village. These same crystal bodies of water soon become the breeding places for countless mosquitoes unless covered with crude oil.
- (g) Azalea time in Yosemite. Sentinel Rock is pictured in the background.

Yosemite Lumber Company

During the month of June the Yosemite Lumber Company employed an average of 114 men at their Camp 15. They operated three donkey engines, hauling to two landings. They cut and shipped to their mill 3,038,000 feet b.m. of logs. They cut over about sixty acres of land, all of which is company land within the Stanislaus National Forest and located in the NE $\frac{1}{4}$ Section 25, Township 2 South, Range 19 East.

At their Camp 16 they employed an average of 171 men during the month. They operated four donkey engines, hauling to three landings. They cut and shipped to their mill 5,819,400 feet b.m. of logs. They cut over about 115 acres of land. Of these amounts 2,488,800 feet b.m. were cut from about 50 acres of Government land under sale contract, located in the SE $\frac{1}{4}$ of Section 19, Township 2 South, Range 20 East. All of the balance, or 3,331,300 feet b.m., were cut from about 65 acres of company land within the Stanislaus National Forest, located in NE $\frac{1}{4}$ Section 19, SW $\frac{1}{4}$ Section 20, and E $\frac{1}{2}$ Section 30, Township 2 South, Range 20 East.

From their Camps 15 and 16 they cut and shipped to their mill 8,857,400 feet b.m. of logs on 1,444 cars, an average of 6,134 feet b.m. per car. They cut over about 175 acres of land, as follows:

125 acres of company land in Stanislaus National Forest
50 acres of Government land in Stanislaus National Forest

To date from their Camps 15 and 16 the company has cut and shipped to their mill 18,531,300 feet b.m. of logs, or 3,023 cars, an average of 6,121 feet b.m. per car. They have cut over about 365 acres of land, as follows:

4 acres of company land in Yosemite National Park
311 acres of company land in Stanislaus National Forest
50 acres of Government land in Stanislaus National Forest

Very truly yours,

W. B. Lewis
Superintendent
