FILE NO.

MONTHLY REPORT FOR FEBRUARY, 1935

**IMPORTANT**

This file constitutes a part of the official records of the National Park Service and should not be separated or papers withdrawn without express authority of the official in charge.

All Files should be returned promptly to the File Room. Officials and employees will be held responsible for failure to observe these rules, which are necessary to protect the integrity of the official records.

February 1935

ARNO B. CAMMERER,  
*Director.*

UNITED STATES  
DEPARTMENT OF THE INTERIOR  
NATIONAL PARK SERVICE

ZION AND BRYCE CANYON NATIONAL PARKS

UTAH

OFFICE OF THE SUPERINTENDENT

P. O. ADDRESS:  
SPRINGDALE, UTAH

March 9, 1935

The Director  
National Park Service  
Washington D. C.

Dear Mr. Director:

The following is my report of operations and conditions in Zion and Bryce Canyon National Parks and Cedar Breaks National Monument during the month of February, 1935.

000 General

020 General Weather Conditions

In sharp contrast with last winter, the month of February delivered an excess of precipitation which on account of fairly warm weather fell mostly as rain in the valley of Zion Canyon. There was a total of 1.8 inches of precipitation recorded at the Zion weather station, and 3.93 inches at Bryce. Snow survey conducted over Cedar Mountain from February 25 to 28 recorded an average of about 58 inches of snow at Cedar Breaks, with a water content of about fourteen inches.

An unusual condition in connection with storms has prevailed all winter in this region, in that the extreme southern part of Utah, including Zion, has received the most precipitation. Time and again we have had storms continuing day after day, with clear weather or only light storms at Cedar City, north.

There is sufficient snow piled up in the Virgin River water sheds to insure ample supply of irrigation water throughout the early growing season next summer.

100 Administrative

120 Park Inspections

121 By Superintendent. On the 1st, accompanied by Engineer Cowell, Architect Doerner, and Chief Ranger Jolley, a trip was made to Parunuweap Canyon to look over the proposed boundary fencing and the location of the section of the Bridge Mountain Trail descending into Parunuweap Canyon.

On the 2nd I went to the South Rim of Grand Canyon, accompanied by Mr. Doerner, returning to Zion on the 3rd. On the 15th a study was made of the location of the section of the Parunuweap Trail ascending to the notch of Bridge Mountain. On the 16th a trip was made into the southwest section of the park to look over possible access truck trail to reach the boundary where a stock fence is to be constructed. On the 21st I accompanied a party of Utah Legislators visiting Zion on their trip to the Temple of Sinawava and through the tunnel, and attended their banquet in the evening at St. George. I also attended their banquet at Cedar City on the evening of the 23rd.

Park Naturalist Presnall left on the 4th for a detail at Educational Field Headquarters in Berkeley.

Assistant Superintendent Parker returned to Zion on the 27th from a detail in the San Francisco Field Headquarters office.

122 By Special Field Representatives. Resident Architect Langley arrived at Zion from Grand Canyon on the 7th and remained here until the 12th when he left with Doerner for inspection at Lehman Caves National Monument. He continued therefrom to San Francisco and Doerner returned to Zion on the 14th.

125 By Other Governmental Officers. Chief Engineer Paul Arentz of the State Planning Board was a visitor in the Zion office on the 6th.

Brigadier General Whitworth, Commander of the Fort Douglas District CCC, accompanied by Colonel Vernet, Medical Officer, made an inspection of our two camps on the 25th and 26th.

Our checking station records show the following officials having checked through the park during the month:

Ranger Ben Swapp, Dixie National Forest, St. George, Utah.  
Mrs. J. B. Moss, Instructor, Indian Service School, Moccasin, Ariz.  
Captain D. L. Harford and 33 boys from Camp at Veyo, Utah.  
Del Meham, Forest Service, Mountain Home, Utah.  
S. L. Gate, Asst. Engineer, State Road Commission, Salt Lake City.  
H. W. Reed, Bureau of Investigation, San Francisco, Calif.  
P. S. Van Arden, Bureau of Investigation, Denver, Colo.  
Sheriff Chas. Cottam, Washington County, St. George, Utah.  
C. H. Cane, British Consul to United States, San Francisco, Calif.  
F. E. Murray, Bureau of Animal Industry, Salt Lake City, Utah.  
Garden T. Hyde, H. O. L. C., Salt Lake City, Utah.  
Walter B. Lewis, Deputy Special Officer, Indian Service, Gallup, N.M.  
Earl C. Wheeler, Deputy Special Officer, Indian Service, Gallup, N.M.  
Mr. Knowlton, State Road Commission, Salt Lake City, Utah.  
I. S. Kerr, F. E. R. A. Engineer, Cedar City, Utah.

J. S. Dwyer, Dept. of Agriculture, Veteranery Inspector, Phoenix, Ariz.  
G. T. Long, Forest Service, Medicine Bow, Wyoming.  
Kenneth Borg, F.E.R.A. Works Division Engineer, Salt Lake City.  
J. H. Gardner, F.E.R.A. Works Division Engineer, Salt Lake City.  
L. V. Peart, Federal Emergency Relief, Salt Lake City.

#### 170 Plans, Maps, and Surveys

Approved plans of truck trail and Temple of Sinawava comfort station have been received. Surveys for boundary fence have been made in Parunuweap Canyon and Shones Creek Canyon. Topographic survey completed of cabin area above Oak Creek residential area. Surveys locating administrative trail through canyon between Bridge Mountain and The Watchman have continued and location is about complete. Considerable work has been done on location and elevations of the Zion monument system, including the new monuments located on Civil Works. When checking has been completed and report completed, the entire floor of the valley will be tied to a reliable monument system. Survey of campground development is about complete. A number of surveys have been made giving lines and grades required for construction projects. Considerable office work has been done completing survey data for projects both in Zion and Bryce and these have been forwarded to Field Headquarters. The work done will provide a record of projects as well as furnish reliable data to be used in revision of master plans. Some additional maps are being prepared and will soon be forwarded to Field Headquarters, including addition to south entrance campground and water and sewer system in Zion and campground development at Lehman Caves.

A field party was in Lehman Caves a few days giving line and grade on projects under construction and establishing a system of permanent monuments in developed area.

#### 200 Maintenance, Improvements and New Construction.

##### 210 Maintenance

Maintenance work performed in Zion has been relatively light, consisting of keeping roadways cleared of rocks rattling from cut banks, repair of temporary sewage disposal pit in the Oak Creek residential area, and constructing a new pit for the upper area.

Our F.W.D. and snow plow were sent over to Bryce on the 19th and cleared the entrance road and the Rim Road as far as Inspiration Point.

##### 230 New Construction

#### Zion Public Works

FP-22, Employees Residence, East Entrance. Temporary sewage disposal constructed and connected with residence. All work completed.

FP-24, Electric System. Five lighting fixtures received.

Zion Emergency Conservation Work

Drought Relief Camp D-NP-2

The strength was about 200 men at the end of the month.

A14-11, General Cleanup. Twenty cords of dead wood from cleanup cut and hauled and sawed into wood lengths.

A1-13b, Minor Road Construction. Forty cubic yards of clay placed on campground roads, surfaced with 115 cubic yards of gravel produced by crushing and hand screening river material. Some grading on campground roads and spurs and finishing grading of roadway at service station in plaza area.

A1-27, Campfire Lecture Circle. Two hundred square feet of flagstone quarried for paving in lecture circle area.

A1-28, Campground Fireplaces. Fifteen fireplaces completed; bases completed and stone quarried for an additional ten.

A10-29, Boundary Fence. Three miles of road bettered in Parunuweap Canyon sufficient to permit trucks to haul posts. One mile made passable for trucks to haul materials to west boundary fences. Seventy rods of fence completed in Parunuweap and 800 cedar posts delivered. Seventeen hundred posts hauled from site of cutting east of park to floor of valley.

A1-34, Forestation Planting. Three hundred and twenty-eight cottonwood trees planted near Cable Creek and 1200 feet of irrigation ditch dug in campground area. Many shrubs were planted in campground and dead shrubs replaced at superintendent's residence. Shrubs and trees planted in Oak Creek residential area and at junction of Oak Creek Road with highway. Shrubs and trees were principally dug in the vicinity of the east entrance checking station. This work is being well done and a high percentage of growth is expected.

A2-52a, Cribbing. Two hundred and thirty-nine lineal feet of standard basket dam was constructed; 204 cubic feet of toe dam built; 200 truck loads of crib rock and 150 cubic yards of backfill hauled and placed. Wire placed over 325 lineal feet of standard basket dam, tying to bottom wire already in place. 450 feet of minor construction road built in the quarry.

All-53b, Landscaping. A little grading was done in upper residential area. 50 lineal feet of 8 inch and 500 lineal feet of 4 inch stone curb has been placed in Oak Creek residential area and 70 lineal feet of 4 inch curb quarried.

#### Bridge Mountain Camp NP-4

The strength of the camp at the end of the month was 225. During the month seven were discharged to take jobs near their homes. New athletic equipment has been received and the boys can be found every evening at baseball or horseshoe pitching. The educational classes are being well attended and according to reports from Educational Advisor Williams, a great deal of interest is being taken in them. During the month 200 of the enrolled men visited Boulder Dam. Two trips were made by the E.C.W. trucks, each trip carrying 100 men. These carried their bedding and spent one night at Las Vegas, Nevada. An Army officer, two foremen and one mechanic accompanied each contingent.

53b, Road Sloping. Work continued on this project during the month of February with an average crew of 40 men and four trucks. About 900 cubic yards of earth and loose rock was removed from the road slopes and used to strengthen the fills. The last of February will see the road from the east portal of the tunnel to the east park boundary in a condition that will not necessitate the daily road patrol for the removal of falling rock and earth.

14a, Administrative Trail. This project supplied work for 40 enrolled men, two foremen, one compressor and three pack horses for the month. A great many of the rock walls occur at points where suitable rock is not obtainable. This makes the building of these walls rather slow. This, and the weather for the month, has retarded progress to a considerable extent. About 18% of the trail is complete and when finished will be one of the most spectacular trails in Zion Park.

28, Utility Buildings. The masonry on the warehouse is finished, roof on, floor finished and windows and door in place. On Monday, March 3, the moving of the warehouse stock to this building will commence. The masonry on the machine shop is 100 per cent complete, but the wood work is being held up awaiting the arrival of material. Work on the foundation for the equipment shed is under way. The loading platform still remains 95 per cent complete.

31, Pine Creek Irrigation System. Some work was done during the month on testing for the foundation for a diversion dam. There has been no definite location for this dam decided on yet, and no actual progress reported for the month.

28, South Entrance Pillar. The work on the pillar on the east side of the road is 50 per cent complete.

24, Temple of Sinawava Comfort Station. Excavation for this structure is in progress. The material from this excavation is being used to fill and beautify around the parking area.

### Bryce Public Works

FP-15a, Cattle Guards. The contractor has completed his contract to arc weld the rails to beams for the two guard roadways.

### 300 Activities of Other Agencies in the Park

#### 310 Public Service Contractors

There was a slight increase in patronage of the cafeteria and housekeeping cabins at Bryce.

The State Bankers Association Convention held last June at Bryce Canyon Lodge was so satisfactory that it is announced the annual convention this year will be held at Zion Lodge.

### 400 Flora, Fauna, and Natural Phenomena

#### 410 Ranger-Naturalist and Guide Service

On February 2 Park Naturalist Presnall delivered a lecture at Bridge Mountain Camp NP-4 on the subject "Our National Parks". He left on the 4th for a detail in the Berkeley office in connection with completion of the Zion relief models and to assist in museum planning for these parks.

#### 460 Birds

With the assistance and advice of Drs. Grinnell, Linsdale, and Miller, the park naturalist has been able to prepare his Zion bird observations in scientific form for publication. The Utah Academy of Sciences will publish it in July. Copy will be submitted to the Director some time before that date for approval.

#### 470 Animals

Zion. During clear weather numerous deer are being seen along the highway in Zion Canyon in bunches of 5 to 25, but during stormy weather they all promptly disappear, probably seeking the shelter of bushy side canyons. Range conditions are favorable and deer observed are in excellent condition. Cougar tracks were reported to have been seen in the Temple of Sinawava but on investigation the chief ranger could not verify the report.

Bryce. Ranger Cope reports having seen during the month one red fox, one coyote, several rabbits, rats, chipmunks, squirrels, and four porcupine. Bird life is observed to be very plentiful.

Cedar Breaks. During the snow survey over Cedar Mountain many birds and a few coyotes, porcupine, squirrels and rabbits were seen. Naturalist Assistant Keller reports having seen and followed the tracks of a wolverine on Brian Head.

#### 500 Use of Park Facilities by the Public

##### 530 Visitors

Zion. The 68 per cent increase in travel for the month of February brought the yearly increase to 33.5 per cent. Increase for the month is due largely to the large party of Legislators visiting Zion on the 21st. There were 181 persons in the party, consisting of 13 State Senators, and 58 of the 60 Representatives, accompanied by members of their families and conveyed to the park and St. George by Cedar City residents.

Thirty-three enrolled members of the Veyo, Utah, CCC camp, accompanied by Captain D. L. Harford, visited Zion on Sunday, February 24th.

Bryce. Following the opening of the entrance road, visitors began coming in and in the seven days to the close of the month 35 cars and 137 visitors were recorded.

#### 600 Protection

##### 610 Police Protection

The south entrance checking station was operated daily for twelve hours throughout the month, where an average of \$14.17 per day was collected in entrance fees. On account of the official nature of the visit of the State Legislators no entrance fee was charged for the private automobiles from Cedar City which transported the party to Zion and St. George.

A CCC foreman and his crew of sixteen enrollees were ordered by the chief ranger to return to the east entrance of the tunnel to extinguish a fire that they had left burning at the conclusion of the days work. Two truckdrivers were reported to the Project Superintendent of D-NP-2 for speeding.

At Bryce, Ranger Cope has been kept occupied keeping the roofs of buildings free from snow, observing range and wildlife conditions, and patrolling the east boundary. He kept watch on the cougar hunt east of Cope Canyon to prevent trespassing the park. Four cougars were killed by the party and a fifth escaped by crossing over into the park.

## 620 Fire Protection

The regular monthly fire drill was held on February 15 at residence No. 7 in Oak Creek. The alarm was given from the south entrance checking station at 4:05 P.M.; the first man arrived at the scene two minutes after the alarm was given, and water was played on the house one minute later. The roof ladder was up and a man on the roof four minutes after the alarm. Project Superintendent of NP-4 and twenty foremen and enrolled men were at the scene four minutes after the alarm. The hose truck with two fire extinguishers arrived in six minutes, being delayed by mud.

## 630 Accidents

Mr. W. R. Stubbs of Provo, Utah, drove his Ford V8 over a rock on the Mount Carmel Highway and broke the crank case and damaged the oil pump, disabling the car so that it had to be towed to Springdale for repairs. A GOC foreman towed the car in. Mr. Fred Howard of Logan, Utah, drove a Ford V8 over a rock near the same place and did nearly the same amount of damage but was able to get to a garage on the car's own power.

## 900 Miscellaneous

Application was received from Atherton Productions, Inc., to film a movie "The Cowboy Millionaire" in Zion National Park during March. This is the same company which filmed "The Dude Ranger" in this region last summer. A wire was sent to your office on February 27 recommending granting of permit. I have heard indirectly that the Secretary's office wired the company that permit would be granted only on payment of \$5,000 fee.

Everett Ruess, a twenty year old artist and explorer, following his visit to Bryce on November 1 left for Escalante on the 8th where he outfitted for two months and departed to explore the wilds of southern Utah between Escalante and Lees Ferry, where he was due to arrive in about two months time. Nothing has been heard from him since leaving Escalante, and he is now one month overdue. On request of his parents some searching activities are being undertaken out of Escalante by residents of that neighborhood.

Very truly yours,

F. P. Patraw  
Superintendent
