2. Entrance to an American igloo-type magazine. In December 1941, two of these magazines served as hospitals, one was the Marines' command post, and only the fourth continued to store aerial bombs. Only three remain.

5. One of five Japanese semicircular blockhouses, each with three embrasures, on Wake. They are modified versions of the circular, four-embrasure blockhouses found on Roi and Saipan Islands.

6. Western tip of Wilkes Island. Domed Japanese pillboxes are not common. One wonders if American prisoners had a hand in constructing this one. Evidently, the embrasure was too wide; half of it was filled in. Barbed-wire stake in foreground.

10. Inside a Japanese underground structure on Peale Island. Although it was stoutly constructed with heavy plank and steel beams, its interior lining is fast caving in.
