Axton-Fisher Tobacco Company Warehouse, Jefferson County, Kentucky

Description

The Axton-Fisher Tobacco Company Warehouse (JFSW436) was constructed in 1921 at 1405 West Broadway in Louisville, Kentucky. The building was built for the Frank A. Menne Candy Company, and became part of the Axton-Fisher Tobacco Company when it was purchased from the National Candy Company in 1932.

The building is situated on the north side of Broadway and Fifteen Streets on the fringe of the central business district, in the Portland Neighborhood of Louisville. The five story building is sited at a zero lot line on Broadway, and a sidewalk stretches to the street. The site includes a paved area to Fifteenth Street which provides access to the loading bays on the west façade.

The building is sited adjacent to the PennCentral Railroad (now CSX) tracks. The building fronts on Broadway, a major thoroughfare for the city of Louisville. The Axton-Fisher factory building was located at Twentieth and Broadway, only five blocks away.

Centers of the tobacco industry in Louisville have included West Main Street and East and West Broadway. River traffic relied on warehouses on Main Street for storing and distributing tobacco and tobacco products throughout the nineteenth century. The tobacco industry concentrated on West Broadway in the early twentieth century, relying on rail, river and overland transport of goods and supplies.

The architect of the building is unknown. The building is designed with Beaux Arts-inspired detailing. The main, or south, façade is faced in brown brick and topped with a parapet. The east, west and north facades are exposed reinforced concrete. A yellow glazed brick cornice is topped with a concrete detail at the east and west corners of the main façade. Stone keystones and pilaster capitals accent the main façade.

Construction is reinforced concrete. The interior is open floor spaces supported by columns. This open floor plan allowed for the building to be easily converted to warehouse space from space used for candy production.

The main façade is divided into five bays with brick pilasters between each bay. The main pedestrian entrance to the building is located on the west corner of the main façade on Broadway. A pedestrian entrance is sited on the east corner of the main façade, and a one story attached garage entrance is now fitted with windows. A three story neighboring building shares the east façade with the attached garage. The original iron gates are in place on the west façade.

A three-bay delivery entrance is located on the west façade. The rear of the building is a loading dock. An alley on the north façade provides access to the loading dock.

Page 2

Axton-Fisher Tobacco Company Warehouse, Jefferson County, Kentucky

The building is topped with a flat roof. A large steel crane is situated on the roof of the building. A large marquis on the east façade has been removed. During the 1930s the sign promoted the Twenty Grand brand of cigarettes made by Axton-Fisher.

The windows of the building fitted with steel frame double hung sashes. The first story windows are fitted with one-over one windows, and upper story windows are outfitted with eight-over eight multi-panes. Several panes of glass are missing, and some window and door openings have been covered by plywood. The window openings have not been changed from the original design.
Axton-Fisher Tobacco Company Warehouse, Jefferson County, Kentucky

Significance
The Axton Fisher Tobacco Company Warehouse (JFSW436) at 1405 West Broadway is locally significant under Criterion A within the area of Industry for its role in the manufacturing and distribution of consumer tobacco products from 1932 to 1944. This building is important within the context of Tobacco Manufacturing in Louisville, 1880-1945, and is important as an extant symbol of the evolution of the tobacco industry in Louisville. This warehouse illustrates the growing importance of the Axton-Fisher Tobacco Company as the largest independent tobacco company in the United States by the end of the first decades of the twentieth century. The introduction of individually packaged cigarettes by Axton-Fisher in the 1920s and early 1930s necessitate the purchase of this warehouse for storing loose leaf tobacco acquired by the newly formed leaf-buying affiliate begun by AFTC in 1931.

Historical Context: Tobacco Manufacturing in Louisville, 1880 - 1945
The tobacco industry in Louisville began soon after early settlement. Louisville's location on the Ohio River made it ideal for manufacturing and shipping tobacco products. Tobacco became an important crop in Kentucky in the 1830s. Tobacco was the most important crop to early nineteenth century Virginia, and the most important to that state's economy. Kentucky's early nineteenth century economy relied heavily on tobacco and it was the second most important crop to the farmers of the state (George Yater - Two Hundred Years at the Falls).

Louisville was the center of the tobacco market in Kentucky by 1880, hosting the largest hogshead auctions, and was the center of tobacco manufacturing for the state. Louisville's location at the Falls of the Ohio gave it an advantage of access to both local and international tobacco supplies. There were many contracts with European tobacco concerns to supply tobacco to factories in Louisville (Price).

By the end of the nineteenth century Louisville was the site of the largest loose leaf tobacco market in the world. Many of the tobacco warehouses were located in the city along Main Street between Sixth and Twelfth Streets. That area of the city became known as the Tobacco District, and sometimes called the "Breaks", because of the practice of breaking open of the large wooden barrels which tobacco was stored in, called "hogsheads" (Hugh Foshee – Enterprise Tobacco Warehouse National Register Nomination). Tobacco-related buildings were also concentrated along East and West Broadway from the late nineteenth into the twentieth century, and some still exist there today.
The importance of tobacco to the economy of Louisville can be seen in the city directory of 1890. A review of businesses in Louisville shows that all aspects of tobacco storage and manufacturing were represented in the directory. The storage of raw materials and finished products was evident in the existence of fifteen tobacco warehouses. There were sixteen manufacturing plants making tobacco twists by the turn of the century, and nearly 80 other tobacco production concerns that accounted for snuff and cigar production in Louisville. These businesses provided tobacco products across the state and the region.

By 1906 the method of packaging tobacco as loose leaf was introduced in Lexington, modeled on Virginia auctions. This new technique of loose leaf tobacco replaced the packing of twists of tobacco into barrels. The new method tied tobacco stalks and stored them in open baskets. This method took predominance over packing and sales in barrels across the statewide burley market. Lexington replaced Louisville as the center of the burley trade, with its new loose leaf auction houses, by 1930. The last hogshead auction was held in Louisville in 1930.

Tobacco use increased at the turn of the century, as did tobacco production. Cigarette consumption in 1900 was reported at approximately three billion for the year 1900. By 1916, industry figures showed an increase to twenty-five billion cigarettes smoked annually by consumers. The first blended tobacco cigarette was introduced in 1913. Those smokers who had formerly rolled their own cigarettes were moving to manufactured cigarettes in record numbers in reaction to the improved cigarettes being offered (Courier-Journal, November 30, 1941).

Thirty-five billion cigarettes were consumed in 1917, the first year of the First World War. Louisville was the center of cigarette production during World War One when tobacco use by soldiers created a huge boon to the market. Tobacco industry sources reported that cigarette use doubled during the years of World War One (Courier-Journal, November 30, 1941). The Louisville market of cigarettes may also have been positively impacted by the large population of soldiers stationed at Camp Taylor in Jefferson County.

Changes in state laws also increased new markets for cigarettes, and increased production met these needs. Eleven states (all located in the Midwest) repealed laws which had prohibiting smoking and therefore the sale or purchase of cigarettes. Following the repeal of the ban on cigarettes, Iowa became the first state to levy a tax on cigarette sales (Courier-Journal, November 30, 1941).
Axton-Fisher Tobacco Company Warehouse, Jefferson County, Kentucky

The burley tobacco market hit on hard times in 1920 when weather conditions resulted in poor quality tobacco being grown in the state. Demand had not declined, but the substandard product threatened the market. A group of Kentucky businessmen, including Robert Worth Bingham of Louisville, worked to form the Burley Tobacco Growers cooperative Association to help increase the quality, and thus the price of tobacco on the market. These efforts quickly restored the market and made growing tobacco profitable once again. In fact, the tobacco industry, unlike others in Louisville, thrived during the Depression era of the 1930s.

A major boon to the cigarette industry was the increased use of cigarettes by female consumers. The returning Doughboys brought their cigarette habits home with them following World War One, and the women in their lives began acquiring the habit. An advertising campaign for Lucky cigarettes appealed to the stated desires of women in America during the Flapper-era of slim, boyish figures to shed the “old fashioned figure” and aspire to “the slim,...when diets were at their height.” The slogan, “Reach for a Lucky instead of a sweet” resulted in millions of women choosing to have a cigarette instead of candy. This assertion is born out by the cigarette sales figures of 1928, when with the added female consumer’s cigarette consumption recorded total cigarette consumption figures in that year to exceed 100 billion cigarettes for the first time in history (Courier-Journal, November 14, 1941).

Brown and Williamson opened a factory in Louisville in 1929, and moved its headquarters to Louisville by 1931. By 1931 the tobacco industry in Kentucky was bringing in approximately 150 million dollars annually, and tobacco farmers were earning nearly 100 million dollars for their produce (Lexington Herald Leader, November 19, 1931). The British-American Tobacco Company moved to Louisville in 1931 from it's former United States headquarters from New York City in 1931. By 1934, the Axton Fisher Company, the largest independent tobacco company in America, was grossing $28 million in sales, thanks in large part to the introduction of "Spud" the first mentholated cigarette (Price). The tobacco industry continued to grow with increased production and sales throughout the mid-twentieth century, and by 1944 Philip Morris purchased the Axton Fisher Tobacco Company and took over production at its facilities.

Philip Morris’ acquisition marks a trend in the Louisville tobacco industry of large companies purchasing smaller, local tobacco companies and creating large conglomerates. The importance of the Louisville tobacco market is illustrated by the move of two international tobacco companies, British-American Tobacco and Phillip Morris, to Louisville in the 1930s and 1940s. This trend in the tobacco industry documents the movement from independently owned, multiple tobacco factories making small batches of products to a few large, international companies making numerous brands of cigarettes, and other tobacco products.
Axton-Fisher Tobacco Company Warehouse, Jefferson County, Kentucky

History of Axton Fisher Tobacco Company and the 1405 West Broadway Warehouse

Woodford Fitch Axton and brother Edwin Dymond Axton formed the Axton Fisher Tobacco Company (AFTC) in 1905 at Twentieth and Broadway. The company manufactured and sold leaf tobacco products which enjoyed regional success. The company produced primarily bagged, or chewing tobacco at its factory at Twentieth and Broadway. Products included *White Mule*, *Axton's Natural Leaf*, *8 Hour*, *Booster* and *Wage Scale* chewing tobacco. The company also manufactured a Turkish cigarette known as *Clown*.

The company operated as a local manufacturer for the first decades of its existence. AFTC entered the national tobacco arena in 1926 when the company purchased the rights to manufacture the first mentholated cigarette called Spud. The company purchased the product from Lloyd "Spud" Hughes, the products inventor. The company hired an advertising agency from New York City to promote Spud cigarettes nationally (Axton, W.F.) Spud cigarettes quickly became an international brand, and it was reported that members of the Antarctic Expedition led by Byrd packed Spud cigarettes.

AFTC purchased the building at 1405 West Broadway in 1932 from the National Candy Company for use as a warehouse to store loose leaf tobacco used in the production of the Axton-Fisher brands of cigarettes. The building was constructed in 1921 by the Frank A. Menne Candy Company and was considered "one of the most modern in the city" (Courier-Journal, *Axton-Fisher Buys Plant On Broadway*, November 15, 1931). The purchase of this building was the Axton-Fisher Company's response to the increased sales of their products—increasing their physical plant to increase operations. Interestingly, it was at this time that candy sales were being compromised by increased use of cigarettes by female consumers. The purchase of the candy factory for the warehouse is yet another indication of the growing economic importance of the tobacco manufacturing industry. This building was used to store loose leaf tobacco being purchased by a newly formed affiliate of the company. This affiliate purchased loose leaf tobacco in large quantities, and this was the first off-site warehouse purchased for loose leaf storage. The building's 165,000 spare-foot, open floor plan made it ideal for use as a warehouse for tobacco. In addition, its proximity to the factory only five blocks West on Broadway made this existing building an ideal

Beginning in 1932 the Axton-Fisher company manufactured and packaged individual cigarettes for ten cents, for those who could not afford a pack of cigarettes. The Economic Depression of the 1930s was the inspiration to the product, providing an affordable single cigarette called Twenty Grand. The name for the cigarette was chosen from the winner of the 1931 Kentucky Derby, Twenty Grand.

The production of Spud and Twenty Grand opened international markets for Axton-Fisher and the production of cigarettes was an industry which improved during the years of the Economic Depression of the 1930s. The Twenty Grand brand was wildly popular, earning total annual sales of 28 million dollars by 1934. (Axton, W.F.)
Axton-Fisher Tobacco Company Warehouse, Jefferson County, Kentucky

Axton Fisher plants manufactured five percent of the cigarettes produced in America by the 1930s. A new factory was built at Twentieth and Maple Streets in 1933, and the plant at Twentieth and Broadway was converted to a loose leaf tobacco storage warehouse. During its peak of production, AFTC employed 1200 people, running three shifts. The company owners actively supported Union membership and operated programs to assist employees and their families. The construction of the factory building in 1933 included showers for the men in the factory and special restrooms for female employees. Many of the products created by AFTC were aimed at working class consumers (Axton, W.F.).

Woodford Axton died in 1935 and his brother Edwin retired soon after. The family sold shares of the company to keep the manufacturing plant going, but the business suffered. In 1944 the Axton-Fisher Company was purchased by Philip Morris and consumed into its international operations. This warehouse was not part of the plan for Philip Morris' Louisville operation, and it was sold in 1944.

Work on the New Home Will
Begin Soon

(From Journal of March 15, 1925)

Rumor that an effort would be
made to have the Grand Lodge re­
consider its action in making the as­
essment for the New Home has
caused the Board of Directors to ap­
peal to the Grand Master for advice.
After consulting with the Elective
Grand Officers and investigating the
source of the rumor, the Grand Mas­
ter has ordered the work to proceed
when and as needed. All Masons
should read the following communica­
tions and govern themselves accord­
ingly:

Louisville, Ky., Feb. 26, 1925.
Hugh M. Grundy, Grand Master,
Springfield, Ky.

Most Worshipful Sir: The Grand
Lodge of Kentucky directed the Board
of Directors of the Masonic Home to
erect a new Home for the destitute
widows and orphans and, in turn, the
Board of Directors selected a Build­
ing Committee to carry out the in­
structions so given to it by the Grand
Lodge.

Acting under the reserved authority
as contained in Section 147 of the Con­stitution, the Grand Lodge levied
an assessment against each subordi­
nate lodge of twenty dollars ($20.00)
per member to pay that part of the
estimated cost in excess of the volun­
tary subscriptions made to the Million
Dollar Committee, and directed the
Building Committee to immediately
spend the money for the erection of
the new Home for the widows and
orphans.

Recognizing the sovereign authori­
ty and in obedience to the direction
so given, the Building Committee has,
during the past four months, devoted
a great amount of time to the develop­
ment of the plans and arranging to
carry out the instructions so given.
As we approached the time when we
should enter into contracts which will
place binding obligations on the
Grand Lodge, we heard that some of
the members of two lodges in the
State were objecting to the assess­
ment and had announced their pur­
pose to urge the next Grand Lodge
to reconsider the action taken last
fall, by which the assessment was
made.

We have no doubt that you fully
understand how embarrassing this is
for the Building Committee and while
we do not think this opposition is
widespread, we know that you are
better acquainted with the senti­
ment of the Craft throughout the
State than any other person, that
you fully understand the solemn ob­
ligation of every Kentucky Mason to
obey the mandates of the Grand
Lodge and in order that we may not
be embarrassed by any reactionary
movement or criticism by failing to
obey the commands given to us, we
respectfully ask whether we shall go
forward and award the contracts dur­
ing the present year, or delay further
action until after the next session of
the Grand Lodge.

Awaiting your advice and direc­
tions, which will be followed, we are,
fraternally yours,

Board of Directors of the Masonic
Widows and Orphans' Home,
by

George T. Cross, Vice President.

* * *

Louisville, Ky., March 11, 1925.
Hugh M. Grundy, Grand Master,
Springfield, Ky.

Dear Brothers: I have carefully
considered the contents of your letter
of February 26th asking whether the
Building Committee delegated to
award contracts and superintend the
erection of the new Home, should go
forward and award the contracts dur­
ing the present year, or wait until
after the next session of the Grand
Lodge.

Upon this question the sovereign
Grand Lodge of Kentucky has author­
atively spoken. By unanimous vote
you have been, to use its own lan­
guage, "specially directed by this
Grand Lodge to proceed with the let­
ting of contracts that construction
will be under way and the corner­
stone of the building laid not later
than June 24, 1925, * * * That you
let the contract of the building and
the Grand Lodge pledges its credit
and the credit of the several Lodges
in Kentucky that the money to meet
the cost thereof will be furnished to
